

CUBED FOAM FOR EURO CONTAINERS EG S SEWW 64/12

Soft padding all around

The cubed foam variant is ideal when the contents of Euro containers are to be stowed in a non-slip and shockproof manner. The pre-punched cube structure enables precise adjustment of the pad to the content, for example to a camera or measurement device. Multiple pad inserts are used depending on the height of the container, which means that the shape of the content can be reproduced three-dimensionally.

- Individual adaptation to the most diverse objects
- Reliable anti-slip and impact protection
- Three-dimensional adjustment to the content possible

DETAILS

Dimensions L x W x H	56 x 36 x 11 cm	Colour	anthracite grey similar RAL 7016
Suitable for	EG 64/12 HG, ED 64/12 HG, EDP 64/12 HG	Material	PU
Comprising	2x EG SEWW 64 1x EG SEBW 64	Weight	548 g

Identified risks and safety information

The following potential risks have been identified when using the product:

- Material breakage due to overloading or incorrect handling with an associated risk of cuts*¹
- Risk of injury due to improper handling or heavy lifting
- Risk of slipping on uneven or wet surfaces
- Risk of crushing or pinching fingers and hands*²

Measures for minimising risk

To minimise the risks mentioned, the following safety measures should be observed:

- Always observe the maximum load limit of the product. If this is not specified in the product details, it should be evaluated independently.
- Use suitable lifting and transport equipment.
- Ensure that the product is placed on a stable and level surface.

Material and recycling information

The product is made of recyclable Material and should be disposed of in accordance with local recycling guidelines.

*¹ Appendix: Risk of cuts

Overloading or damage to the material can result in sharp edges that pose a risk of cuts. To minimise this risk, the following precautions should be taken:

- Never exceed the maximum load limit.
- Check the product regularly for signs of damage or cracks and do not use it if such defects are present.
- Wear suitable protective gloves when handling the damaged product to protect your hands from sharp edges.

*² Appendix: Crush risk

There is a risk of crushing or trapping fingers and hands when using the product, especially when stacking, folding or unfolding the product. This risk increases if the product is operated improperly or hastily. To reduce this risk, the following measures should be observed:

- Keep your hands and fingers away from the stacking, folding or collapsing mechanisms while handling the product.
- Carry out all movements slowly and in a controlled manner to prevent the product from closing unintentionally.
- If necessary, use suitable protective gloves to provide additional protection for your hands.
