Soldering & Desoldering Stations

Classic Soldering Stations

GLOBAL. AHEAD. SUSTAINABLE.

RDS 80

The universal, digital soldering station

Order information

Order no.	Description
0RDS80	RDS 80 soldering station with RT 80 soldering iron (0890CDJ), soldering tip 0842CD, heating element 089100J, and tool holder 0A39 with sponge 0003B
1RDS800000A67	RDS 80, 115 V version

PTC

RDS 80 with RT 80 soldering iron, Ersa RESISTRONIC control system.
Soldering tip series 832, 842 and 852 see page 50.

The Ersa **RDS 80** digital soldering station with the proven Ersa RESISTRONIC temperature control provides **80 W** heating power. The ceramic PTC heating element (positive temperature coefficient) acts as the temperature sensor in this control system and ensures extremely fast heating thanks to the high initial output. High heating power and the large selection of soldering tips allow a very wide range of applications. The heating system with the internally heated soldering tips has a high thermal efficiency.

The redesigned ergonomic handle, the housing design and the large, digital multifunctional display do not leave much to be desired.

Besides the arbitrary temperature selection between 150 °C and 450 °C, three fixed temperatures or two fixed temperatures and one standby temperature can be programmed.

Great price-performance ratio

In addition to a power bar graph display the station also has a calibrating and power-off feature. The potential equalization socket (with an integrated 220 kΩ resistor) allows the soldering tip to be equalized with the workplace potential.

The RT 80 soldering iron has a sprayed-on, flexible silicone connecting cable. For tip exchange we recommend to use the tip exchanger 3ZT00164 (see page 38).

Technical data

Station	Rating/Voltage	Temperature	Soldering iron	Rating/Voltage	Heating time	Weight*
RDS 80	80 W/230 V, 50 – 60 Hz/24 V or 80 W/115 V, 50 – 60 Hz/24 V	150 – 450 °C	RT 80	105 W (280 °C)	approx. 40 s (280 °C)	approx. 130 g

Optional Tip'n'Turn
holder for i-TOOL
PICO MK2

*i-CON PICO MK2 with i-TOOL PICO MK2 soldering iron.
Soldering tip series 142 see pages 46/47.*

Fast, efficient and good value for money – these requirements are met by the **i-CON PICO MK2** – the entry-level station for professional soldering within Ersa's i-CON soldering station series. It suits semi-professional and ambitious users in the DIY sector who can do without ESD capability.

In addition to the continuously variable temperature control via the two buttons next to the easy-to-read LC display, three fixed temperatures and three energy levels can be individually set via PC software and microSD card so that the user can quickly switch between the parameters depending on the soldering job. The standby function protects the soldering tip and significantly increases its service life. Another highlight: the soldering station can also be locked for other users via the microSD card.

Weighing only 30 g, the **i-TOOL PICO MK2** soldering iron is extremely ergonomic, making it a pleasure to work with. Heat-up from room temperature to operating temperature only takes

9 seconds. The integrated temperature sensor reacts immediately and accurately, ensuring a constant temperature for safe soldering, even with sensitive components.

With the 142 series, a comprehensive range of cost-effective soldering tips featuring the new Tip'n'Turn technology (see page 8) is available for a wide variety of applications.

Soldering & Desoldering Stations

Industrial and IoT Soldering Stations

GLOBAL. AHEAD. SUSTAINABLE.

TIP'N' TURN

Patented soldering tip technology

Tip exchange in record time and 20 % more power

The latest i-TOOL generation providing 20% more soldering power is one of the smallest and most powerful soldering irons in the market. It increases not only quality and productivity in hand soldering, but also reduces operating costs tremendously.

In contrast to cartridge tips, only the soldering tip is changed – quickly, easily and without any additional tool required. The expensive heating element remains in place which renders the i-TOOL tip technology sustainable both ecologically and

economically. A comprehensive range of standard and customized tips provides an unrivalled flexibility, even with difficult and unusual soldering jobs.

The high-performance heating element supplies 150 W of heat-up power ensuring fastest heat-up and recovery so that the i-TOOL never runs out of energy, even during heat-intensive soldering. At the same time, at 30 g and a compact 150 mm overall length, it is very comfortable to hold.

New i-TIP tip series: Thermally optimized soldering tip design, fast tip change, QR code on each soldering tip, low overall cost.

Tip'n'Turn concept

Due to the patented Tip'n'Turn concept with its bayonet lock, tip exchange is effected within record time. Tips are exchanged with a simple turn either by hand or using tool holder 0A58. The i-TOOL MK2 handle remains cool and convinces also during permanent operation.

Process window and alarm

The i-TOOL MK2 recovers so fast that all solder joints can be made with nearly the same temperature. The sensor measures

the actual tip temperature very close to the tip extremity. The i-CON stations signal the operator if the temperature leaves the pre-set process window.

Automatic standby

As soon as the soldering tool is not used, the temperature drops to the set standby temperature after the preselected standby time.

Super fast tip change: by hand or using the 0A58 tool holder which is compatible with i-TOOL TRACE and all i-TOOL MK2 series soldering irons.

The new i-TOOL MK2 technology

now available for all i-CON stations

i-TOOL MK2 technology advantages at a glance

CHIP TOOL VARIO

The CHIP TOOL VARIO stands out by its high power (2 x 40 W) and its very compact design. Thus, it is perfectly suited for working on very small and delicate SMD components. The heating element pairs are plug-in components. They can be aligned exactly in the handle, and exchanging them is quick and easy. Furthermore, the operating mode of this precision tool can be set from self-closing mode to self-opening mode with an integrated switch. The CHIP TOOL VARIO is equipped with the proven and reliable motion sensor to activate it out of standby.

Desoldering tip pairs,
series 462 see page 52.

*without cable

i-CON NANO MK2

Compact industrial soldering station

Small footprint:
only 145 mm x 80 mm!

*i-CON NANO MK2 with i-TOOL NANO MK2 soldering iron.
Soldering tip series 142 see pages 46/47.*

The **i-CON NANO MK2** realizes ESD safety including potential equalization up to the soldering tip and is the ideal entry-level model for the professional sector and the industry. It is fast and efficient, and it provides good value for money.

An interesting feature for this product class is the configuration of the station via PC software and microSD card. In addition to the continuously variable temperature control, this allows three fixed temperatures and three energy levels to be programmed individually, so that it is possible to switch quickly between the parameters depending on the soldering job. The standby function protects the soldering tip and significantly increases its service life. The soldering station can also be locked for other

users via the microSD card. Operation is effected via the two buttons next to the easy-to-read LC display.

i-CON 1 MK2 with i-TOOL MK2 and holder 0A59.
Soldering tip series 142 see pages 46/47.

The **i-CON 1 MK2** is the popular and proven "workhorse" for electronics production. It comes with the lightweight and ergonomic 150 W **i-TOOL MK2** soldering

iron – the perfect tool for all SMD and PTH applications.

The comprehensive 142 tip series enables the i-TOOL MK2 to be perfectly set for each job.

The digital i-CON 1 MK2 control station features the modern "One-Touch" operating concept with i-Op Control and large, backlit plain text display.

i-CON 2V MK2

Double channel soldering and desoldering station
for multiple applications

The double channel soldering and desoldering station **i-CON 2V MK2** is a consistent further development of the well-known i-CON 2 based on the future-oriented Ersä VARIO platform.

The station utilizes an intelligent power management to dynamically shift its power between the attached tools. i-CON 2V MK2, like all other i-CON stations, convinces by its intuitive one-touch operation and the large multifunctional display. It meets the ESD requirements and is available in a version with interface (i-CON 2VC MK2) to connect a fume extraction unit and a heating plate. If required, the i-CON 2V MK2 can be updated like the i-CON VARIO stations with a microSD memory card and thus is prepared for future necessities.

Optional CHIP TOOL desoldering tweezers

*without cable

Fully equipped workplace with i-CON 2V C MK2 station, i-TOOL MK2, CHIP TOOL VARIO and solder fume extraction.

i-CON with interface

**One control unit for preheating,
soldering and fume extraction**

Fume extraction systems and heating plates are the two most important peripheral systems on the workbench. Ersas i-CON C stations incorporate an interface to control Ersas IR heating plates and Ersas EASY ARM fume extraction systems.

Up to two i-CON 1 C MK2 or i-CON 2V C MK2 stations can be combined with a filter unit EASY ARM 1 or EASY ARM 2 using an interface cable. The extraction unit is only working while at least one of the attached soldering stations is in operation. When both i-CON stations are in standby mode, the EASY ARM filter unit automatically switches off, which results in longer filter lifetime, lower energy costs and less noise.

The safe and powerful medium-wave IR heating plate technology offers enormous advantages in modern hand soldering: soldering iron, internally heated SMD desoldering tweezers and/or desoldering tool can be operated with considerably lower tip temperatures.

This reduces the risk of damage to the assembly while at the same time tip lifetime will substantially increase!

SMD desoldering with the CHIP TOOL desoldering tweezers. Bottom-side preheating of the PCB with a heating plate provides for gentle processes.

THE MISSING LINK

i-CON TRACE IoT Soldering Station

100 % Connectivity

With the i-CON TRACE, Ersa is offering the first soldering station specifically designed for use in a digitally networked environment and for complete traceability in hand soldering. With integrated WLAN, Bluetooth and an upgradeable network card it offers an all-new connectivity.

The operating software Ersa TRACE COCKPIT is available free of charge as a download, and it is installed centrally, i.e. only once, on the customer's server. As soon as a soldering station is integrated into the company network, all mobile end devices (PC, tablet, smartphone) that are in the company network and have the appropriate authorization can access the soldering stations.

Access is via web browser, e.g. Google, Chrome, Firefox, Windows Explorer. The server-based communication concept decisively facilitates the administration of the individual soldering stations by means of connectivity: Firmware updates, calibration intervals and much more can be carried out and monitored centrally from one computer.

Traceability

Specific soldering tasks can be centrally assigned to each soldering station – via MES, PC or mobile device. Thereby all essential parameters such as the soldering tip to be used, temperature, soldering wire and flux are set centrally by qualified personnel. This significantly increases process reliability: Each workpiece is soldered according to the predefined specifications. The operator can concentrate fully on soldering and the susceptibility to errors is reduced.

Fully comprehensive documentation/ MES connection

Seamless process data documentation is a key-feature of future electrical production. The i-CON TRACE closes the last gap in the manual soldering process and can be completely integrated into MES-controlled production processes. Thus it is already possible to download a recording of the entire soldering task via a desired file format and save this in a higher-level control system. In the future, even real-time communication between the soldering station and the customer's MES will be possible.

GREEN MEANS GO!

Poka Yoke is a Japanese term meaning "error prevention" or "error-proofing". It is a method of designing a process or product to prevent defects from occurring in the first place. By using poka-yoke techniques in solder manufacturing, manufacturers can help improve product quality and increase efficiency and productivity.

i-CON TRACE is designed to minimize errors and defects during the soldering process.

Usability

With only one on/off switch and three LEDs, the interface of the soldering station differs significantly from all other industrial soldering stations with their complex setting options and a display. The work for the personnel at the soldering station is significantly simplified. By means of a hand-held scanner the component, soldering tip, solder wire and flux used are recorded. In this way, the system "knows" that all the conditions for the assigned soldering task are met.

The LED interface then literally gives the user the green light as soon as the predefined temperature is reached at the soldering tip. An effective measure to ensure that each solder joint is soldered with the exact temperature and the right material. Any malfunctions (e.g. defective heating element, wrong

soldering tip in relation to the component) are detected by the system and reported to the operator. If all parameters are correct, the soldering process is authorized. During soldering, the i-CON TRACE records the process data. Every soldering process is precisely documented and traceable.

PREMIUM PERFORMANCE. MINIMUM COST.

With 150 W heating power, the i-CON TRACE offers outstanding performance. It heats up very quickly, and reheats even faster, and thus ensures a stable temperature profile. Newly designed soldering tips transfer the heat to the solder joint with pinpoint accuracy. The heating element and soldering tip can still be replaced separately. This saves resources and money, because each wearing part only needs to be replaced when it is really necessary. The i-CON TRACE is therefore not only an economic but also an ecological benefit for every electronics production.

Via the mobile app Ersas TRACE for smartphones and tablets, the i-CON TRACE can be used like a conventional stand-alone soldering station even without a connection to a company network. The program for controlling the soldering station runs on the mobile end device – relevant information such as set and actual temperature is displayed on a smart device via WLAN and can also be changed there. This enables demand-oriented, smart operation for the user.

Soldering & Desoldering Stations

High-End Stations for Soldering and Rework

GLOBAL. AHEAD. SUSTAINABLE.

Multiple tools for all applications

Tools for i-CON VARIO 2 MK2 & i-CON VARIO 4 MK2

i-TOOL AIR S

The ergonomic i-TOOL AIR S hot-air iron provides 200 W power permitting the user to process a wide range of SMDs in a non-exhausting way. The hot-air volume can be adjusted very easily directly on the handle, and the set air volume (2 – 20 l/min) is clearly visible on the display of either the i-CON VARIO 2 or the i-CON VARIO 4. Various nozzle sizes are available for an optimal component heat-up.

Hot-air nozzle series 472
see page 54.

i-TOOL HP

The i-TOOL HP offers maximum power for high-mass solder joints. With 250 W and exchangeable soldering tips, it delivers HIGH POWER in manual soldering. This tool can be operated on nearly all i-CON VARIO stations (compatibilities see pages 22, 23). For stand-alone operation, Erska recommends the i-CON VARIO 2 HP (0ICV2000HP) version.

Soldering tip series 242
see page 51.

**i-TOOL MK2 and
CHIP TOOL VARIO**
see page 9

CHIP TOOL

The CHIP TOOL desoldering tweezers are characterized by a large tip portfolio for all common components. The inserted tips can be changed in a second. The optional tip turn protection set allows plug'n'play tip changing. Opening and closing width can be adjusted individually enabling comfortable and safe working even in cramped spaces. In addition to i-CON, i-CON 2, i-CON 1V, i-CON 2V and the i-CON VARIO family, the CHIP TOOL can also be used with many older control units (DIGITAL 2000 A, MICRO CON 60 iA, SMT UNIT 60 A etc.).

Desoldering tip pairs, series
422/452, see page 53

X-TOOL VARIO

The X-TOOL VARIO convinces with highly efficient 150 W heating technology. The design of heating element and desoldering tip ensure an efficient thermal transfer and a fast evacuation of the extracted solder. The slim shape of heating head and desoldering tip allow desoldering even on densely populated PCBs.

i-CON VARIO 2 MK2

Double channel soldering and desoldering station

i-CON VARIO 2 MK2 with i-TOOL AIR S and X-TOOL VARIO

Connectable tools

- **i-TOOL AIR S** hot air iron (200 W)
- **i-TOOL MK2** soldering iron (150 W)
- **CHIP TOOL VARIO** desoldering tweezers (2 x 40 W)
- **CHIP TOOL** desoldering tweezers (2 x 20 W)
- **X-TOOL VARIO** desoldering tool (150 W)
- **i-TOOL HP** high-power soldering iron (250 W)

For detailed descriptions please refer to pages 9 and 21.

The multichannel soldering and desoldering station **i-CON VARIO MK2** provides the professional user with two soldering tools that can be used simultaneously.

0A58

Tip'n'Turn holder for i-TOOL MK2

All functions, including the generation of the air and the vacuum required in the process are united in the supply unit, which features the easy to operate i-Op Control and a clearly arranged display. In addition, the

soldering stations have interfaces to connect the Erska solder fume extraction units or infrared heating plates, as well as an USB port. Via a micro-SD memory card, software updates are quick and safe.

i-TOOL MK2, CHIP TOOL, CHIP TOOL VARIO and X-TOOL VARIO are plugged in bushing A1. The high-performance bushing A2 can be used to operate either the i-TOOL AIR S (200 W) or the i-TOOL HP (250 W). The station without the pumps is for users that want to use exclusively the tools i-TOOL HP, i-TOOL, CHIP TOOL VARIO, CHIP TOOL.

i-CON VARIO 4 MK2

Multichannel soldering and desoldering station

The **i-CON VARIO 4 MK2** multichannel soldering and desoldering station meets the highest requirements in professional soldering and desoldering in every field of professional electronic manufacturing – including ESD protected zones. The high-end version of the i-CON family is based on the i-CON VARIO 2 MK2 and is the only soldering station in the world to provide the user with four soldering tools at the same time for demanding soldering tasks (detailed tool descriptions see pages 9 and 21):

- The **i-TOOL AIR S (200 W)** hot air iron – flexible SMD soldering and desoldering with non-contact energy transfer
- The **i-TOOL MK2 (150 W)** – efficient and powerful contact soldering with extensive tip range
- The **CHIP TOOL VARIO (2 x 40 W)** – precise desoldering of finest SMD components

- The **CHIP TOOL (2 x 20 W)** – safe desoldering of heat-sensitive SMDs
- The **X-TWOOL VARIO (150 W)** desoldering iron – for safe and clean desoldering of PTH components
- The **i-TOOL HP (250 W)** – for large and high-mass solder joints

All functions, including the generation of air and vacuum, are united in the supply unit of the i-CON VARIO 4 MK2 which is also equipped with the easy to operate i-Op Control and its clearly arranged displays. The station has interfaces for solder fume extraction units or infrared heating plates as well as an USB port. Via a micro-SD memory card the stations can be configured and updated safely and quickly. The high-performance bushing A2 can be used to operate either the i-TOOL AIR S (200 W) or the i-TOOL HP (250 W).

Fume Extraction EASY ARM

GLOBAL. AHEAD. SUSTAINABLE.

EASY ARM 1 AND EASY ARM 2

For a healthy work environment

Technical highlights

- Efficient 3-stage particle and gas filtering
- Super silent operation
- Independently adjustable suction power per arm
- Optical and acoustical filter exchange status
- Easy and fast filter exchange – without tools
- Identical filters for EASY ARM 1 and EASY ARM 2

Ersa solder fume extraction **EASY ARM 1** and **EASY ARM 2** stand out by a high suction power and an efficient filter performance combined with super silent operation. Exhaust volume per arm is 100 m³/h. Both are equipped with filters that clean the process air in three stages: The pre-filter absorbs dust and big particles. The combined filter separates micro particles which occur during soldering and absorbs dangerous gas molecules in the incorporated activated carbon filter.

The operator can choose between a system with one exhaust arm – the **EASY ARM 1** – and a unit with two exhaust arms – the **EASY ARM 2**. Both units can be mounted individually by means of their table clamp. Exhaust power is set independently for each extraction arm at the touch of a button. The **EASY ARM 1** and **EASY ARM 2** use an identical pre-filter

and combined filter. Optical and acoustical signals inform the operator when filters have to be exchanged.

A wide range of exhaust arms and nozzles for all applications are available so that the user will find the proper solution for his requirements.

For energy saving purposes and to extend filter lifetime, both units can be connected with Ersas i-CON soldering stations or a standby switch. In this way, the extraction unit is only working whilst the attached soldering station is in operation, stopping as soon as the soldering station goes into standby mode.

GLOBAL. AHEAD. SUSTAINABLE.

UNIVERSAL SOLDERING IRONS

Ersa 30 S and MULTI-TIP

Ersa 30 S stands out by its sturdiness and longevity and is available with **30 W** and **40 W**. It can be used in a variety of ways for soldering tasks in handicrafts, service and hobbies. Delivery includes a practical, easy to mount rubber stick-on support disk.

*Ersa 30 S universal soldering iron. Soldering tip series 032 see page 55.
The Ersa 30 S is also available with heat-resistant cable: order no. 0330KD0028.*

The **MULTI-TIP** irons cover a wide range of applications and stand out by low weight and compact design. The handle stays cool while soldering. The MULTI-TIP is available with 15 W and 25 W and suitable for micro-soldering joints and medium-sized soldering. Internally heated soldering tips and long-life PTC heating elements provide high efficiency and a constant tip temperature.

STANDARD SOLDERING IRONS

Ersa 50 S, Ersa 80 S and Ersa 150 S

The soldering irons **Ersa**

50 S/80 S/150 S are designed for soldering operations with a greater heat requirement, as, for example, on copper conductors with a cross-section of 2.5 mm² (Ersa 50 S, 50 W) to 6 mm² (Ersa 150 S, 150 W).

The devices are supplied with an angled soldering tip as standard. Thanks to their elaborate "protective coating", ERSADUR tips have a long service life.

Other areas of application include soldering thin sheet metal and lead glazing (Ersa 150 S).

Standard soldering iron Ersa 50 S. Soldering tip series 052 see page 55.

HIGH-SPEED SOLDERING IRONS

MULTI-SPRINT solder gun

The Ersa **MULTI-SPRINT** is an extremely light, transformer-independent solder gun with a heat-up rating of up to 150 W and an ergonomic design.

In combination with the internally heated ERSADUR longlife soldering tip, the MULTI-SPRINT's PTC (Positive Temperature Coefficient) heating element offers especially high performance. The short heat-up time makes it ideal for high-speed series soldering.

The MULTI-SPRINT is heated only as long as the button is pressed.

The large selection of tips of the 832 / 842 series affords a wide range of applications, and not just in service and repairs.

TEMPERATURE CONTROLLED IRONS

PTC 70 and MULTI-TC

PTC 70 - power soldering iron with temperature control. Soldering tip series 832/842 see page 50.

The Ersa **PTC 70** is a powerful and sturdy universal soldering iron with Ersa RESISTRONIC temperature control. This proven temperature control system together with the ceramic PTC heating element provides

unusually fast heat-up and heat recovery. Due to the accurate temperature control and the wide range of ERSADUR longlife tips of the 832 and 842 series, the PTC 70 is a perfect tool for both very small solder

joints as well as for applications with medium heat requirements. The PTC 70 is supplied with the soldering tip 0832CDLF.

MULTI-TC - power soldering iron with temperature control. Soldering tip series 832/842 see page 50.

The Ersa **MULTI-TC** is a powerful, sturdy, temperature-controlled universal soldering iron with a precise temperature sensor located directly under the internally heated soldering tip. This temperature sensor registers the actual temperature in the immediate vicinity of the solder joint. Consequently, the heating system with

internal PTC heating element immediately reacts to the heat loss and recovers very fast.

The high heating efficiency and the large selection of soldering tips serve filigree applications in electronics. The MULTI-TC can also be used for further applications,

for example classical lead glazing and Tiffany soldering.

By dispensing with a heavy transformer and thanks to its heat-resistant connecting cable, the Ersa MULTI-TC is especially suitable for mobile use in service, maintenance and repairs.

GAS SOLDERING IRON

INDEPENDENT 75

INDEPENDENT 75 PROFI-SET

- INDEPENDENT 75 gas soldering iron with soldering tip 0G072KN
- Soldering tips 0G072CN, 0G072AN and 0G072VN
- Flame nozzle 0G072BE
- Hot gas nozzle 0G072HE
- Hot blade 0G072MN
- Deflector 0G072RE to shrink heat-shrinkable sleeves
- Tool holder 0A20
- Cleaning sponge with sponge container 0G157/SB

Soldering tip series G072 see page 54.

Mobile power – wherever you want! Powerful, with comprehensive and top-quality equipment, small, handy and practically packed. The Erska **INDEPENDENT 75 BASIC-SET** and **PROFI-SET** gas soldering sets will meet your every need! The ergonomic, antistatic gas soldering iron with piezo ignition is ideal for service and maintenance work, especially if there is no power supply available! The continuously adjustable output of 15 – 75 W (compared with electrical soldering irons) allows maximum soldering tip temperatures

of up to 580 °C. The INDEPENDENT is powered by filtered butane gas. Operating time per gas filling is about 60 min.

Both sets come with a practical carrying case. Besides the standard **BASIC-SET** equipment, the **PROFI-SET** contains two additional soldering tips, a hot blade for cutting high-resistance foam, a hot-gas nozzle, a deflector for heat-shrinkable sleeves and a flame nozzle for micro-welding.

INDEPENDENT 75 BASIC-SET

- INDEPENDENT 75 gas soldering iron with soldering tip 0G072KN
- Soldering tip 0G072CN
- Holder 0A20
- Cleaning sponge with sponge container 0G157/SB

Order information

Order no.	Description	With soldering tip	Rating/Voltage	Heating time	Max. tip temperature	Weight
0G07400041	INDEPENDENT 75 BASIC-SET gas soldering set	...KN; ...CN	15 – 75 W	approx. 46 s (280 °C)	approx. 580 °C	73 g

GAS SOLDERING IRON

INDEPENDENT 130

Soldering tip series G132 see page 54.

The “big” gas soldering device from Erska, the **INDEPENDENT 130**, can be applied wherever demanding soldering tasks have to be performed without a power supply.

Its broad range of continuously variable **25 – 130 W (compared with electrical soldering irons)** and its comprehensive range of soldering tips allow a wide variety of uses in service, installation, maintenance and repair work.

- INDEPENDENT 130
PROFI-SET**
- INDEPENDENT 130 gas soldering iron with soldering tip OG132KN
 - Soldering tips OG132CN, OG132AN and OG132VN
 - Flame nozzle OG132BE
 - Hot gas nozzle OG132HE
 - Hot blade OG132MN
 - Deflector OG132RE to shrink heat-shrinkable sleeves
 - Cleaning sponge with sponge container OG157/SB

The integrated piezo ignition and powering by filtered butane gas ensure the easiest possible handling and great reliability. The operating time per gas filling is about 120 minutes, with a maximum tip temperature of about 580 °C.

Like its smaller mate, the INDEPENDENT 75, the INDEPENDENT 130 is also available in both set versions, namely as a **BASIC-SET** or **PROFI-SET**.

- INDEPENDENT 130 BASIC-SET**
- INDEPENDENT 130 gas soldering iron with soldering tip OG132KN
 - Soldering tip OG132CN
 - Holder 0A20
 - Cleaning sponge with sponge container OG157/SB

Accessories and process materials

GLOBAL. AHEAD. SUSTAINABLE.

TEMPERATURE MEASURING DEVICE

DTM 110

In certified businesses and from a quality standpoint, regular checks of the soldering tip temperature are obligatory. Erska soldering stations are extremely temperature-stable over their entire service life.

Possible differences between the set and actual value due to differences in tips or to slight heating element tolerances in the RESISTRONIC control system can be easily ascertained with the **DTM 110** temperature measuring device and corrected easily and fast on nearly all Erska soldering stations.

Also available
with calibration
certificate

The DTM 110 is equipped with a patented sensor unit (K-type) with sensor wires made of chromel and alumel. It provides exact temperatures of even finest soldering tips.

Order information

Order no.	Description	Measuring range	Operating temperature	Power supply	Dimensions without sensor unit	Weight*
ODTM110	DTM 110 temperature measuring device	-65 – 1,200 °C	-20 – 50 °C	2 x AA battery, 1.5 V	approx. 108 x 54 x 28 mm	approx. 125 g
ODTM110C	DTM 110 temperature measuring device with factory calibration certificate	-65 – 1,200 °C	-20 – 50 °C	2 x AA battery, 1.5 V	approx. 108 x 54 x 28 mm	approx. 125 g

*with batteries

VACUUM PIPETTE

SVP 100

The **SVP 100** vacuum pipette can be used to handle nearly all components, except MELFs and MINI-MELFs. This tool consists of a nickel-plated aluminum handle, sealed at the rear end by a plug.

When opened, replacement tips and suction cups can be stored here.

Order information

Order no.	Description	Length	ø Housing diameter	ø Cup diameters	Weight
OSVP100	SVP 100 vacuum pipette, complete, with bent tip OSVP12K and 3 silicone cups OSVP13A	150 mm	14 mm	4 mm, 6 mm, 9 mm	60 g

DESOLDERING DEVICE

SOLDAPULLT AS 196

The **SOLDAPULLT AS 196** model is distinguished by extremely good recoil damping and has proven its merit many times over in industry. The dual seal ring system guarantees constant suction power on a high level.

SOLDAPULLT AS 196 desoldering device

Order information

Order no.	Description	Desoldering tips	Suction capacity
0AS196	SOLDAPULLT AS 196 antistatic desoldering device	0LS197	34 cm ³

PINCETTE

3ZT00165

Components from all areas of electronics, especially SMT technology, can be easily and safely picked and handled with the **3ZT00165** tweezers.

Order information

Order no.	Description
3ZT00165	Pincette to pick and handle components

TIP EXCHANGER

3ZT00164

For changing all internally heated soldering tips as well as hot-air nozzles, we recommend tip exchanger **3ZT00164** with flat nose pliers and side cutter. These special pliers allow tips to be replaced safely and protectively, even when hot.

Order information

Order no.	Description
3ZT00164	Tip exchanger

TIP REACTIVATOR

The TIP REACTIVATOR works already at low temperatures. It is free of lead and halogenes. To reactivate an oxidized tip, heat-up the tip and wipe it on the surface of the regeneration compound.

Order information

Order no.	Description
0TR01/SB	TIP REACTIVATOR, 15 g can
0TR03/SB	TIP REACTIVATOR, 25 g can

STACKING RACKS

STR 200

The Ersa **STR 200** stacking rack can be used for combining two i-CON soldering stations at a small footprint. The STR 200 is of antistatic design.

Stacking racks for a well-organized workplace
(delivery without soldering stations)

Order information

Order no.	Description
OSTR200	STR 200 stacking rack to arrange the Ersa i-CON soldering stations in a safe and space-saving way on the workbench

SOLDER WIRE DISPENSER

SR 100

The Ersa **SR 100** solder wire dispenser is extremely durable and can accept solder wire reels of up to 1,000 g.

Optimal unwinding of different reels is ensured by a conical centering nut.

The flexibly mounted solder wire guide is suitable for all current solder wire diameters and allows unwinding in the desired direction without having to change the location of the SR 100.

Available as an accessory and easily retrofitted, the Ersa SR 101 kit allows simultaneous use of a second spool.

SR 100 solder wire dispenser
(delivery without solder wire)

SR 101 retrofit kit for a second solder wire spool,
optionally available (delivery without solder wire and SR 100)

Order information

Order no.	Description	Solder wire spools	Spool receiver diameter
OSR100	SR 100 solder wire dispenser for one spool	250 g, 500 g, 1,000 g	14 mm
OSR101	Retrofit kit SR 101 for a 2nd spool	250 g, 500 g, 1,000 g	14 mm

TOOL HOLDERS AND ACCESSORIES

Soldering and desoldering devices are heating devices and, depending on the application, can attain high temperatures during operation. This equipment must never be operated without supervision;

during longer interruptions of work they should be switched off and always be stored in suitable tool holders. Most of the **Ersa tool holders** are made of metal or heat-resistant duroplastic, and

most are antistatic. Most holders have a viscose or brass wool for tip cleaning, as well as options for conveniently resting and storing soldering and desoldering tips.

TOOL HOLDERS & CLEANING SPONGES

	Order no.	Description		Order no.	Description
	0A04	Tool holder for soldering irons from 50 W – 150 W output; ISOTYP and 0185PZ soldering irons		0A56	Tool holder for X-TOOL VARIO desoldering iron
	0A05	Universal tool holder for medium-sized and small soldering irons		0A57	Tool holder for i-TOOL HP soldering iron
	0A08MSET	Brass wool 0008M/SB with container for dry cleaning of soldering tips		0A58	TIP'N'TURN Tip'n'Turn holder, antistatic, for i-TOOL TRACE, i-TOOL PICO MK2, i-TOOL NANO MK2 and i-TOOL MK2 soldering irons
	0A17	Tool holder for soldering irons from 200 W to 550 W		0A59	Tool holder for i-TOOL MK2, i-TOOL NANO MK2 soldering irons
	0A18	Tool holder for soldering irons of the MULTI-TIP series; TIP 260 soldering iron		0A60	Tool holder for i-TOOL PICO MK2 soldering iron
	0A20	Tool holder for gas soldering irons INDEPENDENT 75 and INDEPENDENT 130		3N194/SB	Rubber support disk for MULTI-TIP, MULTI-PRO, Ersa 30 S soldering irons
	0A39	Tool holder for RT 80 soldering iron		0G157/SB	Sponge container with sponge for INDEPENDENT 75 and INDEPENDENT 130 gas soldering irons
	0A42	Tool holder for TIP TOOL, POWER TOOL, ERGO TOOL, MICRO TOOL and TECH TOOL soldering irons		0009/SB	Splash guard for 0A58 tool holder
	0A43	Tool holder for CHIP TOOL desoldering tweezers		0003B/SB	Viscose sponge, blue, 55 x 55 mm, for tool holders 0A09, 10, 13, 16, 24, 25, 28, 29, 30, 34, 35, 36, 39, 41 – 45, 48
	0A45	Universal holder for 832 tip series (C8 – C18, MD, QD, ZD models), solder wire feed unit and solder fume extraction		0004G/SB	Viscose sponge, 34 x 65 mm for tool holders 0A05, 0A21, 0A26 and 0A58
	0A54	Tool holder for CHIP TOOL VARIO desoldering tweezers		0008M/SB	Brass wool, single piece packaging (pack of 10: 0008M/10)
	0A55	Tool holder for i-TOOL AIR S hot air iron

SOLDER WIRE

Ersa **solder wire** consists exclusively of high-quality raw materials. Manufactured on state-of-the-art machines, the wire meets all quality requirements. It is manufactured in different dimensions and with different alloys, to meet all practical requirements. Different types of "flux cores" allow individual adaptation to all soldering needs, especially in electronics and the electro-nic industry.

Please refer to the Ersa
webshop for a detailed list
including wire diameters,
further information
and order numbers.

*Available in different alloys and drum sizes
in order to meet various fields of application.*

Order information

Solder alloy according to DIN EN 29453	Flux according to DIN EN% flux share	Melting temperature
Sn96.5Ag3.0Cu0.5	29453, J-STD-004A/EN61190-1-1: ROL0, halogen-free, 3.5 %	217 °C
Sn96.5Ag3.0Cu0.5	29453, J-STD-004A/EN61190-1-1: RELO, halogen-free, 1.6 %	217 °C – 219 °C
Low-residue, halogen-free No-Clean solder wire. Especially adapted to the requirements in electronic production. The flux stands out by high temperature resistance, and it does not spray while melting. The light, solid flux residues are neither corrosive nor electrically conductive. Consequently it is not necessary to remove them from the solder joint.		
Sn60Pb40	29453, J-STD-004A/ EN61190-1-1: RELO, 1.4 %	183 °C – 190 °C
Sn63Pb37	29453, J-STD-004A/EN61190-1-1: ROL0, halogen-free, 0.9 %	183 °C

Subject to changes

DESOLDERING WICKS

Ersa **desoldering wicks** are saturated with halogen-free No-Clean flux. They are suitable for protectively removing excess solder and old solder, especially from boards carrying SMD components. A fine

copper fabric with high capillary power ensures optimal desoldering results. The additional use of a flux cream may be appropriate under certain circumstances.

Order information

Order no.	Description	Package size*
0WICKNC1.5/10	No-Clean wick, length 1.5 m, width 1.5 mm	10 pcs.
0WICKNC2.2/10	No-Clean wick, length 1.5 m, width 2.2 mm	10 pcs.
0WICKNC2.7/10	No-Clean wick, length 1.5 m, width 2.7 mm	10 pcs.
0WICKNC4.9/10	No-Clean wick, length 1.5 m, width 4.9 mm	10 pcs.

*single-piece package also available

FLUX AND FLUX REMOVERS

Ersa No-Clean flux creams available in different quantities

FLUX-REMOVER

FLUX-PEN

Ersa **No-Clean flux and flux cream** have proven their merit especially in all repair processes in SMD technology. Like all Ersa consumables, they meet the appli-

cable standards and quality requirements. They can easily and precisely be applied by means of the FLUX-PEN or cartridge, supplied with plunger and needle.

Excess residue is removed, if necessary, by means of the FLUX-REMOVER with the aid of absorbent, non-pulping paper towels or specially offered ESD-safe products.

Soldering and desoldering tips

GLOBAL. AHEAD. SUSTAINABLE.

ERSADUR

Longlife soldering tips

The soldering tip is the "heart" of the soldering iron. Its job is to transfer the heat from the heating element via the solder to the solder joint. Depending on the soldering iron and the application, different types of tips are available. Prerequisites for good solder joints are a correct tip shape, perfect heat transfer, an excellent condition of the tip and a reliable stability. In addition, the soldering tip also has to convey the necessary amount of sensitivity back to the operator.

ERSADUR longlife tips are designed for continuous operation and for high-quality results. They are galvanically plated with an iron coating and protected against corrosion and oxidation by an additional chrome layer. This manufacturing process was developed and is used exclusively by Erska. The ERSADUR tips' perfect thermal conductivity protects the heating element from overheating and premature wear. Erska offers a comprehensive range of soldering and desoldering tips for the diverse requirements.

Professional tip care

for optimal soldering quality and a long tip life

In the field of hand soldering, a long tip lifetime with continuously good soldering results is essential for the users. Oxidized soldering tips can only slowly melt the solder, which decreases productivity. A soldering tip needs care in order to ensure an efficient process. Dry cleaning of soldering tips offers substantial advantages. The

tips are not cooled abruptly and contaminated tips resulting from dirty sponges are avoided. Due to the slightly abrasive properties of the special wire mesh, passive layers that accumulated on the tip can easily be removed. Tip life is thus increased considerably in lead-free hand soldering.

Dry cleaning with metal wool

340 – 360 °C for lead-free solder

Remove dirty metal wool and empty the solder collecting box

Cleaning with damp sponge

Sponge (0003B) must be damp

Carefully wipe off tip

Just stick soldering tip into dry cleaner and turn

Add new solder after cleaning

DAMP – NOT WET!

Immediately add new solder

PRODUCTS FOR TIP CARE

Erska brass wool

The Erska brass wool (order no. 0008M/SB*, 0008M/10*) is an alternative to the wet sponge and can be beneficial, especially in lead-free soldering.

VARIO TOOL service tool

Service tool (order no. E074600) for:

- Tip exchange and cleaning of X-TOOL VARIO
- Nozzle change of i-TOOL AIR S

Cleaning kit for tip series 742H (X-TOOL VARIO)

The cleaning kit includes the fitting drill bits for the tips of the 742H series to remove residues in the suction channel of the tip (order no. E074700).

Cleaning brush

Brush with brass bristles for gentle tip cleaning (order no. 3ZT00051). It can also be used to clean heating elements.

*SB = single piece packaging, /10 = 10 pcs. per packing unit

PERSONNEL QUALIFICATION AND SERVICES

For over 100 years, Erska has been the first address for all soldering needs. Erska equipment is designed for top performance – but for top soldering results the user also needs the latest tech knowledge. We provide you with the appropriate know-how to make your electronics production even better. Whatever your needs, our training program covers all aspects of professional soldering – from solder paste printing, reflow, selective and wave soldering to rework and hand soldering.

You can join any time! Our wide range of digital and on-site trainings certainly offers the fitting qualification measure for your needs.

Some examples:

- Process trainings and practical training courses
- Customer-specific technology days
- Operation and maintenance trainings
- WEBinERSA webinars
- Live demonstrations and test soldering

Further information

Your benefit

- Quality increase in the production of electronic assemblies
- Increased process safety due to higher efficiency of employees and more reliable hand and machine soldering processes
- Competitive advantages due to certified personnel
- Personal, modular certificate
- High training success due to small groups of participants
- Flexible due to modular training concept
- Up-to-date, standardized training materials
- Provides security for audits and verification requirements

WEBinERSA WEBINAR PROGRAM

Our goal is to give all interested parties access to the desired soldering know-how – or in short: With the WEBinERSA we want to make your production even stronger!

Our webinars, each lasting 60 to 90 minutes, provide information on current topics in soldering technology and offer a wide variety: Whether stencil printing, high-end soldering machines, rework and inspection systems or intelligent solutions in classical hand soldering – there is something for everyone.

In the field of rework and hand soldering for example, we'll be covering the basics as well as specific topics such as soldering of PTHs and SMDs on high thermal mass assemblies or big board rework.

Our current WEBinERSA program is available online at www.webinar.ersa.com.

WEBinERSA webinars

Your benefit

- Worldwide and location-independent access to technology know-how
- Qualification of employees through digital system and process training
- Increased flexibility due to online trainings
- Exchange with experts on current topics in electronics production

THAT'S HOW IT WORKS

- Register via our homepage
- Receive confirmation and a link to access your WEBinERSA
- Dial in 5 minutes before the WEBinERSA starts
- Listen to the presentation and get directly in touch with the experts
- Note: The software does not have to be available in the company, it is a web link
