

Dear Sir or Madam,

Referring to your request we hereby confirm that **Polycyclic Aromatic Hydrocarbons (PAH)** are not contained in illegal concentrations in our products like soldering stations / soldering irons / desoldering tools etc. Up to our knowledge even parts of these products are free of PAH contents. The values do not exceed the prescriptive limit.

This statement refers to our sub suppliers data and information in regards to PAH and the matter that the above mentioned products are designed and produced under control of the German VDE. VDE / GS certification includes the testing of correlative PAH regulations.

For ERSA it is self-evident that our products do not generate any risk to health to the operator nor harm the environment during regular and even unintended use. It is our goal to design and adapt products always with reference to the latest technical state of the art and valid technical regulations.

This statement has been made in all conscience. Nevertheless this information cannot be interpreted to be a warranty statement.

We hope this information is meeting your expectations.

Yours sincerely

Joerg Nolte
Vice President R&D
