

ERSA ImageDoc EXP v2.x and v3.x

Statement license replacement

Software license statement

To whom it may concern:

ERSA GmbH is using a license model with a system-linked reference key for locking the ImageDoc EXP inspection software family against illegal installation and use.

On buying a license, ERSA provides a “purchase key” which can be used only once for registration and for receiving a unique activation key for the ImageDoc EXP installation on a specific computer.

In case of the computer hardware or the operating system changes, the activation key won't be valid anymore and the activation procedure has to be repeated.

ERSA hereby commits to provide a spare purchase key in case of the computer hardware or software changes by defect or upgrade of the old hardware or changes in the operating system installation.

The spare purchase key will be provided on request of the customer free of charge by e-Mail.

The spare purchase key will be valid for the same version (v2.x or v3.x) of ImageDoc EXP as purchased only!

Therefore the customer has to send his registration data of the old installation together with the request by e-mail to the ERSA customer service or to his responsible ERSA dealer.

Wertheim, June 2010
