

StaticWisk™ 'L'

Anti-Static Laminator Brush

A Static and Dust Control Product

The **Kinetronics® StaticWisk** anti-static laminator brushes dissipate static electric charges on laminates and improve production quality. **StaticWisk** brushes are also effective in reducing the static that attracts dust and lint.

The **StaticWisk** laminator brushes are made from ultra-soft conductive fibers that are 1 5/8" / 40mm long. A unique magnetic mounting system is used for quick, easy attachment to the laminator. Each brush is furnished with a coiled grounding cord that is secured to the frame of the laminator.

Tens of thousands of **StaticWisk** anti-static brushes are in daily use throughout the world. The **StaticWisk** laminator brushes are available in nine standard sizes from 12" or 300mm to 84" or 2100mm. Custom lengths are available on request. Model sizes show brush length in millimeters (inches):

Model Number	Adjustable Inside Dimensions
SWL-300 (12")	350 to 465 mm (13 3/4" to 18 1/4")
SWL-450 (18")	500 to 615 mm (19 3/4" to 24 1/4")
SWL-625 (25")	680 to 795 mm (26 3/4" to 31 1/4")
SWL-750 (30")	805 to 920 mm (31 3/4" to 36 1/4")
SWL-950 (38")	1010 to 1125 mm (39 3/4" to 44 1/4")
SWL-1250 (50")	1315 to 1405 mm (51 3/4" to 55 1/4")
SWL-1525 (61")	1595 to 1710 mm (62 3/4" to 67 1/4")
SWL-2000 (80")	2075 to 2190 mm (81 3/4" to 86 1/4")
SWL-2100 (84")	2330 to 2445 mm (91 3/4" to 96 1/4")

Quality Static & Dust Control Products Since 1973

Cepillos Antiestáticos Para Laminadoras

Producto antiestático y antipolvo

Los cepillos antiestáticos **Kinetronics® StaticWisk** para laminadoras sirven para descargar cargas electrostáticas en laminados y láminas de revestimiento y así mejorar la calidad de producción. Los cepillos **StaticWisk** reducen también la carga estática que atrae polvo y pelusas.

Los cepillos antiestáticos para laminación **StaticWisk** consisten de fibras conductivas ultrasuaves de 40 mm (1 5/8") de largo. Un sistema especial de fijación magnética permite montar el cepillo rápidamente y sin problemas en la laminadora. Cada cepillo se suministra con un cable de tierra en espiral, sujeto en la caja de la laminadora.

Decenas de miles de cepillos antiestáticos **StaticWisk** se usan diariamente en todo el mundo. Los cepillos **StaticWisk** para laminación se suministran en nueve longitudes estándar de 300 mm (12") a 2.100 mm (84"). Longitudes especiales sobre demanda. Los números de modelo indican la longitud del cepillo en milímetros:

Número de modelo	Ancho interior ajustable
SWL-300 (12")	350 a 465 mm (13 3/4" a 18 1/4")
SWL-450 (18")	500 a 615 mm (19 3/4" a 24 1/4")
SWL-625 (25")	680 a 795 mm (26 3/4" a 31 1/4")
SWL-750 (30")	805 a 920 mm (31 3/4" a 36 1/4")
SWL-950 (38")	1010 a 1125 mm (39 3/4" a 44 1/4")
SWL-1250 (50")	1315 a 1405 mm (51 3/4" a 55 1/4")
SWL-1525 (61")	1595 a 1710 mm (62 3/4" a 67 1/4")
SWL-2000 (80")	2075 a 2190 mm (81 3/4" a 86 1/4")
SWL-2100 (84")	2330 a 2445 mm (91 3/4" a 96 1/4")
