

Guard Mesh Profile 30x30 WG40, L 5600 mm, EcoSafe - Bosch Rexroth 3842522464

Item no. BRR-3842522464

Manufacturer Bosch Rexroth

Guard mesh profile 30x30 WG40 for the Bosch Rexroth EcoSafe safety guarding system. It carries protective frames, guard fences and doors and holds panel infill elements that are clamped without play by the spring clamping element. Standard machining, 5600 mm length, pack of 20.

TECHNICAL DATA

Ausführungsklasse **TEC**

Country of Manufacture **Germany**

Weight **0.0099 kg**

DESCRIPTION

The 30x30 WG40 guard mesh profile is a load-bearing profile in the Bosch Rexroth EcoSafe safety guarding system. It is used to build protective frames, guard fences and doors around machines and production lines and holds panel or mesh infill elements.

- 30x30 mm profile cross-section with WG40 groove for panel elements
- Panel elements are clamped into the profile without play using the spring clamping element
- Standard end machining for simple connections
- Compatible with the 30x30 cover cap and central screw connector
