DESCRIPTION

The bracket 20x20 is an ESD-capable connection set for building right-angle structures from aluminum profiles. It is intended for designers and assembly staff in machine and fixture construction who need a fast-mounting corner joint with a defined load rating.

- Corner joint for profile slot 6 without complex profile machining
- Made of diecast aluminum, vibratory ground, for a clean surface
- ESD-capable for applications with dissipative requirements
- Fastening material in galvanized steel included in delivery
