DESCRIPTION

The Bosch Rexroth central bolt S12x30 joins strut profiles with profile slot 10 in aluminium assembly technology. Its self-forming thread cuts its own mating thread directly in the profile core, so no separate pre-tapping is required. The Torx T50 drive allows reliable torque transmission during tightening.

- self-forming thread, no pre-tapping needed
- Torx T50 drive for high tightening torques
- ESD-capable
- galvanized steel for corrosion protection
