Weight	0.1 kg

DESCRIPTION

OVERVIEW

The Hakko B1354 is a cable retainer (Kabelstopper) designed to secure and manage the handpiece cable on hot air soldering stations. This genuine replacement part is compatible with multiple Hakko hot air handpiece models and helps prevent cable strain and accidental disconnection during soldering operations.

KEY FEATURES

- Compatible with hot air handpieces 850B, 852, 702, and FR-803
- Genuine Hakko replacement part
- Secure cable retention and management
- Prevents cable strain and wear
- Easy installation on existing handpieces

TECHNICAL SPECIFICATIONS

Compatible Handpiece Models	850B, 852, 702, FR-803
Product Type	Cable Retainer / Replacement Part
Country of Origin	Japan

APPLICATIONS

Ideal for maintenance and repair of Hakko hot air soldering stations. Use this cable retainer to replace worn or damaged units, ensuring optimal handpiece stability and cable management during precision soldering and rework operations.
