

Desoldering Nozzle Cleaning Needle 2.0/2.3mm - Hakko B2875

Item no. HK-B2875

Manufacturer Hakko

EAN 4962615013645

Precision cleaning needle designed for Hakko desoldering nozzles 2.0mm and 2.3mm. Removes solder residue and maintains nozzle functionality. Compatible with A1503, N3-20, N3-23, and N60-05 models.

TECHNICAL DATA

Country of Manufacture	Japan
HS-Code	85159080
Weight	0.1 kg

DESCRIPTION

OVERVIEW

The Hakko B2875 is a precision cleaning needle specifically engineered for maintaining desoldering nozzles with 2.0mm and 2.3mm bore diameters. Regular cleaning prevents solder buildup and ensures consistent desoldering performance across multiple work sessions.

KEY FEATURES

- Compatible with 2.0mm and 2.3mm desoldering nozzles
- Fits Hakko A1503, N3-20, N3-23, and N60-05 nozzle models
- Precision-engineered needle design for effective residue removal
- Extends nozzle service life and maintains vacuum integrity
- Essential maintenance accessory for desoldering stations

APPLICATIONS

Ideal for electronics repair technicians, PCB rework professionals, and maintenance personnel who regularly perform desoldering operations. Use after each desoldering session or when nozzle performance degrades.

SCOPE OF DELIVERY

- 1x Cleaning needle
