ESD safe

DESCRIPTION

OVERVIEW

The Hakko B2878 is a back holder stand designed specifically for the FM-2024 desoldering tool. This accessory provides a secure and convenient resting position for the desoldering handpiece when not actively in use, helping to protect the tool and maintain workspace organization during soldering and desoldering operations.

KEY FEATURES

- Purpose-built for FM-2024 desoldering tool compatibility
- ESD-safe design for sensitive component protection
- Secure grip prevents accidental tool displacement
- Compact footprint suitable for workbench integration
- Durable construction for long-term reliability
- Easy installation and setup

TECHNICAL SPECIFICATIONS

Compatibility	FM-2024 Desoldering Tool
ESD Safe	Yes
Country of Origin	Japan

APPLICATIONS

Ideal for professional electronics repair, PCB rework, and desoldering operations where the FM-2024 tool is employed. Suitable for workbenches requiring organized tool management and ESD protection.
