

## Vacuum Outlet Cap with Connection Nozzle - Hakko B2880

Item no. HK-B2880

Manufacturer Hakko

EAN 4962615013690

Vacuum outlet cap with integrated connection nozzle for Hakko desoldering stations. Ensures efficient fume extraction and reliable airflow management in professional soldering environments.

### TECHNICAL DATA

|                        |          |
|------------------------|----------|
| Country of Manufacture | Japan    |
| HS-Code                | 85159080 |
| Weight                 | 0.1 kg   |

### DESCRIPTION

### OVERVIEW

The Hakko B2880 is a vacuum outlet cap featuring an integrated connection nozzle, designed for use with Hakko desoldering stations. This component manages airflow and fume extraction, ensuring optimal performance of vacuum-based desoldering systems.

### KEY FEATURES

- Integrated connection nozzle for secure attachment
- Optimized for efficient vacuum airflow management
- Compatible with Hakko desoldering station systems
- Durable construction for reliable long-term operation
- Designed for professional soldering and desoldering applications

### TECHNICAL SPECIFICATIONS

| Type              | Vacuum Outlet Cap with Connection Nozzle |
| Country of Origin | Japan                                    |

## **APPLICATIONS**

Ideal for professional electronics assembly, PCB rework, and desoldering operations requiring efficient fume extraction and vacuum management.
