

Rectangular Fume Extraction Nozzle - Hakko B3622

Item no. HK-B3622

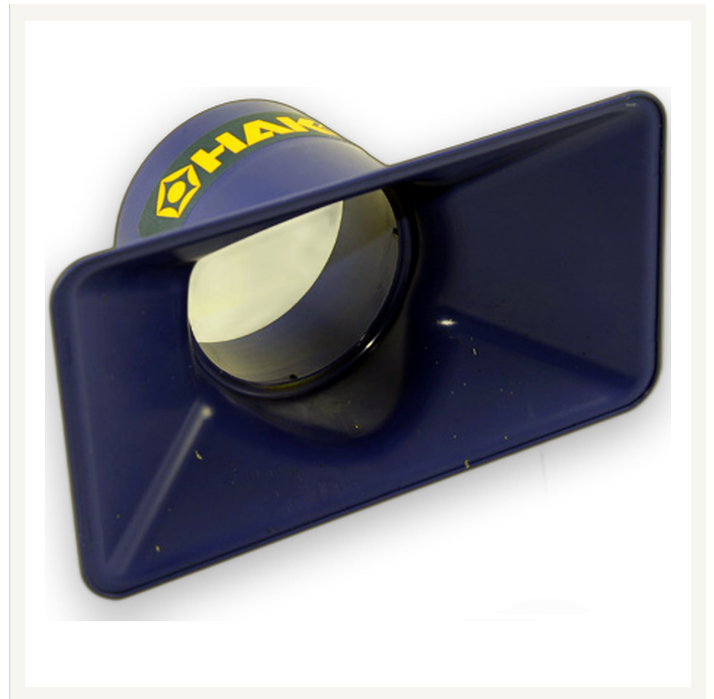

Manufacturer Hakko

EAN 4962615036026

Rectangular fume extraction nozzle designed for the Hakko FA-430 desoldering station. Captures and directs solder fumes away from the work area for improved air quality and operator safety.

TECHNICAL DATA

Country of Manufacture	Japan
HS-Code	84219990
Weight	0.1 kg

DESCRIPTION

OVERVIEW

The Hakko B3622 is a rectangular fume extraction nozzle engineered specifically for use with the Hakko FA-430 desoldering station. This replacement nozzle efficiently captures solder fumes and vapors generated during desoldering operations, directing them toward the extraction system for safe removal from the work environment.

KEY FEATURES

- Rectangular nozzle design optimized for FA-430 compatibility
- Effective fume capture during desoldering operations
- Genuine Hakko replacement part ensuring proper fit and performance
- Durable construction for extended service life
- Easy installation and removal for maintenance

TECHNICAL SPECIFICATIONS

Model	B3622
Nozzle Type	Rectangular
Compatible Equipment	Hakko FA-430 Desoldering Station

Country of Origin	Japan
-------------------	-------

APPLICATIONS

Ideal for desoldering operations requiring efficient fume extraction. Recommended for electronics assembly, PCB rework, and component removal tasks where operator safety and air quality are priorities.

SCOPE OF DELIVERY

- 1× Rectangular Fume Extraction Nozzle (B3622)
