

Multifunction Transformer 3-Port - Hakko B3677

Item no. HK-B3677

Manufacturer Hakko

EAN 4962615038051

Multifunction transformer designed for the Hakko FM-206 rework station. Enables 3-port operation for simultaneous soldering and desoldering tasks. Supports integrated ESD-safe workflow for professional electronics assembly and repair.

DESCRIPTION

OVERVIEW

The Hakko B3677 is a multifunction transformer unit engineered for the FM-206 rework station platform. This 3-port transformer enables simultaneous operation of multiple soldering and desoldering tools, significantly enhancing workflow efficiency in professional electronics assembly, repair, and rework environments.

KEY FEATURES

- 3-port multifunction design for simultaneous tool operation
- Compatible with FM-206 rework station ecosystem
- Supports integrated soldering and desoldering workflows
- ESD-safe operation for sensitive component handling
- Robust Japanese engineering and construction
- Reliable power distribution across multiple channels

TECHNICAL SPECIFICATIONS

Model	B3677
Ports	3

Compatible Station	FM-206
Country of Origin	Japan

APPLICATIONS

Ideal for electronics manufacturing, PCB assembly, component rework, repair shops, and educational institutions requiring simultaneous multi-tool soldering and desoldering capabilities with ESD protection.
