

Transformer 220-240V for IoT Soldering Station - Hakko B5208

Item no. HK-B5208

Manufacturer Hakko

EAN 4962615052217

220-240V transformer designed for the Hakko FN1010 IoT soldering station. Provides stable power supply for consistent soldering performance.

TECHNICAL DATA

Country of Manufacture	Japan
HS-Code	85159080
Weight	0.1 kg

DESCRIPTION

OVERVIEW

The Hakko B5208 is a dedicated transformer unit designed to supply stable 220–240V AC power to the FN1010 IoT soldering station. This replacement transformer ensures reliable operation and consistent thermal performance for professional soldering work.

KEY FEATURES

- Input voltage: 220–240V AC
- Designed specifically for Hakko FN1010 IoT soldering station
- Stable power delivery for consistent soldering performance
- Manufactured in Japan to Hakko quality standards
- Replacement part for maintenance and repair

TECHNICAL SPECIFICATIONS

Input Voltage	220–240V AC
Compatible Station	Hakko FN1010
Country of Origin	Japan

APPLICATIONS

Ideal for replacement or spare transformer supply in professional soldering environments using the Hakko FN1010 IoT soldering station.
