

Solder Wire Guide Tube 0.6-0.65mm - Hakko B5272

Item no. HK-B5272

Manufacturer Hakko

EAN 4962615056673

Kein Produktbild

Precision guide tube for 0.6-0.65mm diameter solder wire. Designed for use with Hakko automatic solder feeders 373 and 374. Compatible with soldering irons 907, 908, FN1101, FM2030, FX8002, FX8301, FX8801, FX8805 and stations 936, 937, FN1010, FM203, FM206, FX801, FX838, FX888, FX889.

TECHNICAL DATA

Country of Manufacture	Japan
HS-Code	85159080
Weight	0.1 kg

DESCRIPTION

OVERVIEW

The Hakko B5272 is a precision guide tube designed for automatic solder wire feeding systems. It accommodates 0.6-0.65 mm diameter solder wire and ensures smooth, consistent wire feed during soldering operations. This replacement component is essential for maintaining optimal performance of Hakko automatic feeder systems.

KEY FEATURES

- Precision-engineered guide tube for 0.6-0.65 mm solder wire diameter
- Compatible with Hakko automatic solder feeders 373 and 374
- Works with multiple soldering iron models including 907, 908, FN1101, FM2030, FX8002, FX8301, FX8801, and FX8805
- Supports numerous soldering station models: 936, 937, FN1010, FM203, FM206, FX801, FX838, FX888, FX889
- Integrates with hose package C5058 and iron holders B5265 and B5267
- Genuine Hakko replacement part for reliable performance

TECHNICAL SPECIFICATIONS

Solder Wire Diameter	0.6-0.65 mm
Compatible Feeders	373, 374

Compatible Iron Holders	B5265, B5267
Country of Origin	Japan

APPLICATIONS

Ideal for electronics assembly, PCB soldering, and rework operations requiring automatic solder wire feeding. Suitable for both production and repair environments where consistent, hands-free solder application is required.

SCOPE OF DELIVERY

- 1x Solder Wire Guide Tube B5272
