

Automatic Solder Feed Pen 0.6-1.0mm - Hakko C1234

Item no. HK-C1234

Manufacturer Hakko

EAN 4962615534287

Automatic solder feed pen designed for the Hakko 373 system. Handles solder wire diameters from 0.6 to 1.0mm with consistent, controlled feed rates for professional soldering applications.

TECHNICAL DATA

Country of Manufacture	Japan
HS-Code	85439000
Weight	0.1 kg

DESCRIPTION

OVERVIEW

The Hakko C1234 is an automatic solder feed pen engineered for use with the Hakko 373 automatic solder feeder system. This precision accessory delivers controlled solder wire feeding in the 0.6–1.0mm diameter range, enabling consistent joint quality and improved productivity in high-volume soldering operations.

KEY FEATURES

- Compatible with Hakko 373 automatic solder feeder
- Supports solder wire diameters from 0.6 to 1.0mm
- Precision feed mechanism for consistent solder delivery
- Ergonomic pen design for operator comfort
- Reliable performance in production environments

TECHNICAL SPECIFICATIONS

Supported Wire Diameter	0.6–1.0mm
Compatible System	Hakko 373
Country of Origin	Japan

APPLICATIONS

Ideal for automated and semi-automated soldering in electronics manufacturing, PCB assembly, and precision component soldering where consistent solder feed is critical.
