

Soldering Tip Concave Composite - Hakko T20-1610

Item no. HK-T20-1610	Manufacturer Hakko	EAN 4962615040337
----------------------	--------------------	-------------------

Composite concave soldering tip designed for Hakko FX 8301-01 and FX 8302-01 soldering irons. Provides consistent heat distribution and reliable solder joint quality for precision work.

TECHNICAL DATA

Country of Manufacture	Japan
HS-Code	85159080
Weight	0.1 kg

DESCRIPTION

OVERVIEW

The Hakko T20-1610 is a composite concave soldering tip engineered for use with Hakko FX 8301-01 and FX 8302-01 soldering irons. The concave geometry is optimized for efficient heat transfer and solder flow, making it ideal for general-purpose soldering applications requiring reliable contact and consistent results.

KEY FEATURES

- Composite construction for durability and thermal performance
- Concave tip geometry for optimal solder wetting and heat distribution
- Compatible with FX 8301-01 and FX 8302-01 iron models
- Professional-grade replacement tip for precision soldering work
- Reliable heat transfer characteristics

TECHNICAL SPECIFICATIONS

Model	T20-1610
Tip Type	Concave Composite
Compatible Irons	FX 8301-01, FX 8302-01

Country of Origin	Japan
-------------------	-------

APPLICATIONS

Ideal for general soldering, PCB assembly, component rework, and maintenance applications where consistent heat transfer and reliable solder joint formation are required.
