

Soldering Tip 2BC Format - Hakko T36-BC2

Item no. HK-T36-BC2

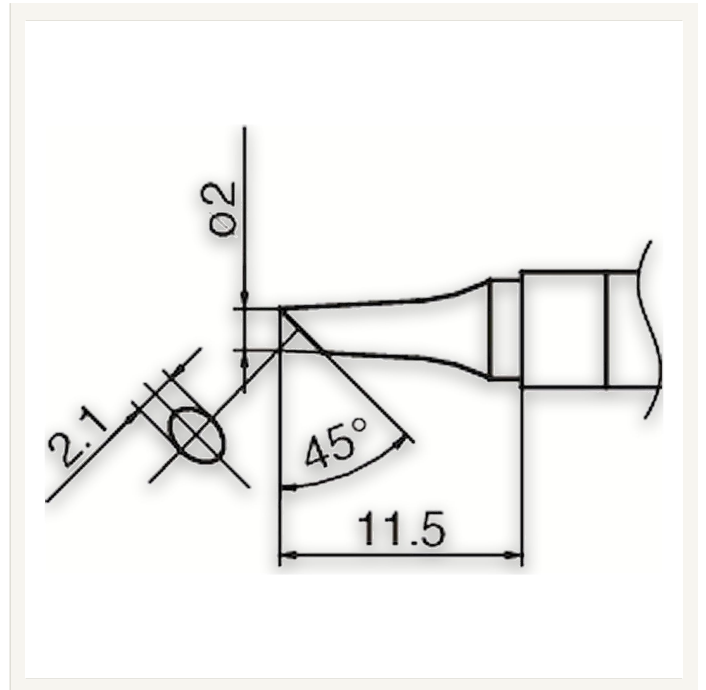

Manufacturer Hakko

EAN 4962615052378

Genuine Hakko T36-BC2 soldering tip in 2BC format, designed for use with FN 1101 and FN 1102 IoT soldering irons. Delivers consistent heat transfer and superior solder joint quality.

TECHNICAL DATA

Country of Manufacture	Japan
HS-Code	85159080
Weight	0.1 kg

DESCRIPTION

OVERVIEW

The Hakko T36-BC2 is a precision soldering tip in 2BC format, specifically engineered for IoT soldering applications with the FN 1101 and FN 1102 soldering irons. This genuine Hakko tip ensures optimal thermal conductivity and reliable solder joint formation.

KEY FEATURES

- 2BC format design for IoT soldering irons
- Compatible with Hakko FN 1101 and FN 1102 models
- Precision-engineered for consistent heat transfer
- Genuine Hakko manufacturing quality
- Durable construction for extended service life

TECHNICAL SPECIFICATIONS

Tip Format	2BC
Compatible Irons	Hakko FN 1101, FN 1102
Country of Origin	Japan

APPLICATIONS

Ideal for IoT device assembly, micro-electronics soldering, and precision PCB work requiring reliable thermal performance and consistent solder joint quality.
