

HQ 4 Lift Transverse Unit - Bosch Rexroth 3842998035

Item no. BRR-3842998035

Manufacturer Bosch Rexroth

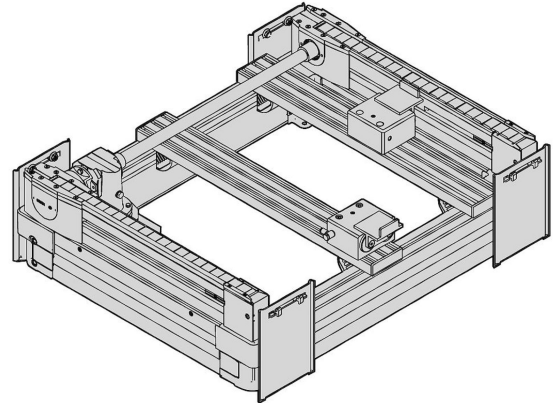

The HQ 4 lift transverse unit transfers workpiece carriers laterally out of or into the main conveyor flow in Bosch Rexroth transfer systems without interrupting line throughput. Its compact design integrates into tight line sections with minimal effort. At under 10 g, the unit is lightweight and straightforward to install or reposition.

TECHNICAL DATA

Ausführungsklasse **TEC**

Country of Manufacture **Germany**

HS-Code **84313900**

Weight **0.0099 kg**

00013029

DESCRIPTION

The HQ 4 lift transverse unit is a diverting element for Bosch Rexroth transfer systems. It moves workpiece carriers sideways - out of the running line or back into it - at defined stations for processing, buffering or inspection, while the main transport flow continues uninterrupted.

- Lateral diversion of workpiece carriers without stopping the main conveyor
- Compact form factor for integration into space-restricted line segments
- Low weight simplifies installation and realignment
- Designed for use in Bosch Rexroth HQ 4 series transfer systems
