DESCRIPTION

The WT 4/F workpiece pallet is part of the modular Bosch Rexroth transfer system and acts as a carrier platform for components and assemblies along the production line. Its low weight of 9.9 g reduces the dynamic load on drive and stop units, allowing high cycle rates.

- Modular fit: direct integration into WT 4 transfer systems without additional adapters
- Lightweight design: 9.9 g net weight protects drive and stop components
- Reusable: built for continuous recirculation in automated assembly lines
