

Cooling Plate for Rework Applications - Ersa 0IR6500-47

Item no. ER-0IR6500-47

Manufacturer Ersa

Cooling plate supplied as original accessory for ERSA rework systems. It provides a defined rest surface on which assemblies can cool down in a controlled manner after the rework process.

TECHNICAL DATA

Ausführungsklasse	TEC
Country of Manufacture	Germany
ESD equipment	ESD Lötstationen
Weight	0.1 kg

DESCRIPTION

The Ersa 0IR6500-47 cooling plate is an original accessory for ERSA rework systems and supports the controlled cooling of assemblies during rework applications.

It provides a defined rest surface on which heated PCBs and components can be safely placed and cooled down after the rework process.

TECHNICAL DATA

Manufacturer	Ersa
Article number	0IR6500-47
Type	Cooling plate
Application	ERSA rework systems
