

AccuTC 2.0 Thermocouple, Type K for Second Measuring Channel - Ersa 0HR645

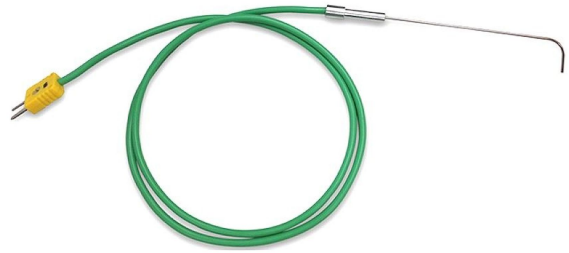

Item no. ER-0HR645

Manufacturer Ersa

The Ersa AccuTC 2.0 is a type K thermocouple for the second measuring channel of Ersa hybrid rework systems. It is designed for temperature measurements with large air volumes and on high-mass, thermally heavy assemblies.

TECHNICAL DATA

Ausführungsklasse	TEC
Country of Manufacture	Germany
ESD equipment	ESD Lötstationen
Weight	0.1 kg

DESCRIPTION

The Ersa AccuTC 2.0 is a type K thermocouple for the second measuring channel of Ersa hybrid rework systems. As an alternative to the standard AccuTC, it is designed specifically for temperature measurements with large air volumes and on thermally heavy assemblies with a high mass.

TECHNICAL DATA

Manufacturer Ersa (Kurtz Ersä GmbH, Wertheim, Germany)

Article number 0HR645

Product type Thermocouple, type K

Function Second measuring channel

Application Hybrid rework systems; large air volumes; high thermal-mass assemblies
