

Absaugarm Highflex mit Gelenk und Tischdurchführung, 500 mm - Ersä 290763

Item no. ER-290763

Manufacturer Ersä

EAN 4003008097603

Flexible Highflex extraction arm with joint and table feed-through, 500 mm long. The feed-through lets the filter unit sit under the table and the angle joint be fixed through a matching bore.

TECHNICAL DATA

Ausführungsklasse	ESD (antistatic)
Country of Manufacture	Germany
ESD equipment	ESD Lötstationen
HS-Code	85159080900
Weight	0.1 kg

DESCRIPTION

The Highflex extraction arm captures solder fume directly at the source and carries it to the filter unit. This version has a table feed-through, so the filter unit can be placed under the table and the angle joint fixed through a corresponding bore.

BENEFITS

- Flexible extraction arm for capture at the solder joint
- Joint for free positioning above the work point
- Table feed-through for a filter unit below the worktop

TECHNICAL DATA

Article number	290763
Type	Highflex extraction arm
Length	500 mm
Features	Joint and table feed-through

APPLICATIONS

Solder fume extraction at manual soldering workstations with the filter unit placed under the table.

COMPATIBILITY

For Erska solder fume filter units with a matching connection.
