DESCRIPTION

ERSADUR-LF permanent soldering tip for the Ersä i-Tool soldering iron, straight design in wick-tip shape with 8.0 mm tip width. The high-quality ERSADUR soldering tips are built for continuous operation: in a special galvanic process they are plated with an iron layer and protected against corrosion and oxidation by an additional chrome layer. The perfect heat transfer protects the soldering iron's heating element from overheating and premature wear.

Suitable for the i-Tool soldering iron (0100CDJ) of the i-CON soldering station in versions 01C1000A, 01C1100A, 01C1100V, 01C2000A, 01C2000AIT, 01C2000AC, 01C2000AXT, 01C2200V, 01C2200VC, 01C2200VIT, 01C2200VXT, 01C2100VC and 01C2100VXT.
