

Metal Wool Dry Sponge for Soldering Tips - Ersä 0008M/SB

Item no. ER-0008M/SB

Manufacturer Ersä

EAN 4003008079531

Dry cleaning sponge made of metal wool for gentle cleaning of soldering tips. The special spiral wool removes oxide layers without thermal shock and extends tip service life. Fits the 0A50 to 0A56 stands and the 0A08M dry cleaner holder.

TECHNICAL DATA

Ausführungsklasse	TEC
Country of Manufacture	Germany
ESD equipment	ESD Lötstationen
Weight	0.02 kg

DESCRIPTION

ERSA dry sponge made of metal wool for the gentle, dry cleaning of soldering tips. When lead-free solder is used, increased oxide forms on the tip and can quickly create a black, non-wettable barrier layer. The special spiral wool reliably removes these accumulated passive layers and extends the service life of the soldering tip.

Unlike a damp viscose sponge, the dry sponge causes no thermal shock. The different metal layers of the tip therefore do not expand at different rates, which avoids micro-cracks and increased wear - the gentler solution, especially when working with lead-free solder.

Suitable for the 0A50, 0A52, 0A54 and 0A56 stands as well as the 0A08M dry cleaner holder.

TECHNICAL DATA

Material	Steel wool
Dimensions	138 x 107 x 30 mm
Weight	0.02 kg
RoHS compliant	Yes
Compatible with	Stands 0A50, 0A52, 0A54, 0A56; holder 0A08M
