DESCRIPTION

ERSADUR-LF long-life soldering tip for the i-Tool soldering iron (0100CDJ) of Erska i-CON stations. Straight, pencil-point design with a 0.6 mm tip diameter for precise soldering work.

ERSADUR soldering tips are high-quality and built for continuous operation. In a special process they are galvanically iron-plated and protected against corrosion and oxidation by an additional chrome layer. Perfect heat transfer protects the heating element of the iron from overheating and premature wear.
