DESCRIPTION

Permanent soldering tip, straight and chisel-shaped, 10 mm, with ERSADUR-LF coating. Designed for the HighPower-Tool soldering iron (0240CDJ) of the i-CON Vario HP soldering station, version 0ICV2000HP.

ERSADUR soldering tips are made to a high standard and built for continuous operation. In a special galvanic process they are plated with an iron layer and protected against corrosion and oxidation by an additional chrome layer. Perfect heat transfer protects the heating element of the soldering iron from overheating and premature wear. ERSA offers a comprehensive range of soldering and desoldering tips for ERSA i-Tool, i-Tool Pico, i-Tool Nano (i-CON soldering stations) and HighPower-Tool.
