

DUR Desoldering Tip Set, straight, 7.5 mm, for SOIC 12/SOT 23 - Ersä 0452FDLF075

Item no. ER-0452FDLF075

Manufacturer Ersä

EAN 4003008087437

Straight desoldering tip set with 7.5 mm edge length and Ersadur-LF coating for SOIC 12 and SOT 23 components. The electroplated long-life tips are built for continuous operation and deliver excellent heat transfer. Fits the desoldering tweezers 40, TC40 and Chip-Tool on Ersä desoldering stations.

TECHNICAL DATA

Ausführungsklasse	TEC
Country of Manufacture	Germany
ESD equipment	ESD Lötstationen
Weight	0.02 kg

DESCRIPTION

Straight desoldering tip set with a 7.5 mm edge length and Ersadur-LF coating, designed for SOIC 12 and SOT 23 components.

Compatible stations are i-CON, i-CON2 and DIGITAL 2000 A, each used with the desoldering tweezers 40 (0430EDJ) or the Chip-Tool (0450MDJ), as well as SMT UNIT 60 A/AS and MICRO-CON 60 iA. Rework 80 and SMD 8000 are used with the desoldering tweezers TC40 (0420EDJ).

Ersadur soldering tips are produced to a high standard and built for continuous operation. In a special process they are electroplated with an iron layer and protected against corrosion and oxidation by an additional chrome layer. The excellent heat transfer protects the heating element of the soldering iron from overheating and premature wear.

TECHNICAL DATA

	Feature	Value
Model		straight
Tip diameter/width		7.50 mm
Shaft outer diameter		3.00 mm
Overall length		82 mm
Tip series		452
Coating		Ersadur-LF long-life tip

Feature	Value
Suitable for components	SOIC 12, SOT 23
RoHS compliant	Yes
