DESCRIPTION

Desoldering tip set with legs at a 90° angle and a leg length of 12.5 mm, featuring an ERSADUR-LF coating for desoldering the PLCC 28 component. ERSADUR tips are produced to a high standard and built for continuous operation: in a special galvanic process they are plated with an iron layer and protected against corrosion and oxidation by an additional chromium layer. Perfect heat transfer protects the soldering iron heater from overheating and premature wear.
