DESCRIPTION

Desoldering tip set with a chisel-shaped, angled geometry, 0.7 mm wide, supplied including the heating element and finished with an ERSADUR-LF plating.

Compatible with the i-CON VARIO 2 and i-CON Vario 4 stations as well as the Chip-Tool Vario desoldering tweezers (0460MDJ).

ERSADUR soldering tips are produced to a high standard and built for continuous operation. In a special process they are electroplated with an iron layer and protected against corrosion and oxidation by an additional chromium layer. Perfect heat transfer protects the heating element of the iron against overheating and premature wear.
