

Bernstein 2302. ESD tool kit OPERATOR KIT 5 pcs

Item no. BS-2302

Manufacturer Bernstein

EAN 4250838516396

ESD tool kit OPERATOR KIT 5 pcs

TECHNICAL DATA

Ausführungsklasse	ESD (antistatic)
HS-Code	82060000
Height	65
Lenght	34
Weight	0.19 kg

STANDARDS & COMPLIANCE

ESD safe

DESCRIPTION

- in dissipative bag
- screwdriver with easy turning cap
- brush with antistatic bristles
- Scissors with conductive handle
- tweezers with conductive powder coating
- with velcro fastener
- measures 135 x 150 x 25 mm
- weight 190 g
- content: screwdriver slot 3.0 mm, cross-recess PH0, SMD-tweezers, ESD-brush, ESD-scissor

Area of application

Conductive tool set in lockable imitation leather cases for handling automatic placement machines during operation.

Technical description

The compact and robust bag made of conductive imitation leather fits well into any work coat bag. Injuries caused by pointed and loosely inserted tools can thus be prevented. All tools are conductive. With their particularly slim design, the screwdrivers are ideal for narrow spaces and very practical thanks to the swivel cap. Scissors and tweezers are coated with a conductive powder coating and can therefore also be used on sensitive components without any problems. The brush consists of conductive plastic up to the bristles and is also particularly slim and handy.
