| Ausführungsklasse | TEC      |
| HS-Code           | 96039099 |
| Lenght            | 12       |
| Weight            | 0.01 kg  |

### DESCRIPTION

- with twist mechanism
- for cleaning, polishing, grinding
- for rust removal, scratching and deburring
- synthetic body
- with brass tip
- bristles made of brass
- brush Ø 4 mm
- length 120 mm
- weight 10 g

### Area of application

Brass wire eraser as a handy and practical assistant for cleaning, polishing, grinding, scratching and deburring, especially for small and filigree handicrafts. It is used in the watch and jewelry industry, in the electrical industry, in car repair shops or in precision mechanics and restorers, and also in the private, hobby and craft sectors, numerous application possibilities arise. Rusty and dirty threads can be easily cleaned and derusted using the 4 mm brass or steel wire insert, especially for inaccessible areas.

- Bernstein 2-163. Glass fibre contact cleaner brush Ø 4 mm, synthetic body with metal tip

#### Technical description

We recommend to try the brass wire eraser in an invisible area. The pen consists of a writing sleeve, in which a replaceable brass or steel brush (mine) is located. The integrated turning mechanism allows infinitely variable length variation of the mine. If a mine is used up, it is simply exchanged for a replacement mine.
