- Bernstein 6750. Tool case SECURITY 55 pcs

Technical description

The compact shape and textured surface give the case a high degree of stability and give it its unmistakable amber design. The use of X-ABS plastic with an extremely non-slip surface makes the case more resistant to external influences. The highly impact and fracture resistant material also makes the case airworthy, as it withstands the rough handling of checked baggage. The ergonomically shaped handle with recessed grips and the ratchet hinges with lid locking complete the picture of a highly functional and modern tool case.
