Technical description

The dimensionally stable and robust roller case for high loads. With the double aluminium frame and the break-resistant X-ABS case shells, the case can carry loads of up to 40 kg and is also airworthy. The 4-fold telescopic pull-out is powder-coated and has an ergonomic handle that complements the case handle in a form-fit manner. Due to the wide wheelbase and the rubberized and mounted castors, the POTECTION XL also masters uneven paths. The ratchet hinges with case lid lock are standard in our tool cases.
