

Watchmaker Screwdriver Slotted 1.5 x 0.23 x 16 mm, Aluminum Rotating-Cap Handle - Bernstein 4-372-AL

Item no. BS-4-372-AL

Manufacturer Bernstein

EAN 4250838526401

This watchmaker screwdriver has a 1.5 x 0.23 x 16 mm slotted blade, sits in an aluminum handle with a smooth-turning rotating cap, and weighs 3 g. It is suited to fine slotted screws in watchmaking, precision mechanics, electronics, and model making.

TECHNICAL DATA

Ausführungsklasse	TEC
HS-Code	82054000
Weight	0.003 kg

BERNSTEIN 4-372-AL

DESCRIPTION

In watchmaking and precision mechanics, the exact blade width decides whether a slotted screw seats cleanly or the slot gets damaged. The 4-372-AL provides a 1.5 mm wide blade in an aluminum handle with a smooth-turning rotating cap for exactly this purpose.

BENEFITS

- Slotted blade 1.5 mm wide and 0.23 mm thick for a precisely fitting grip in the screw slot.
- Aluminum handle with a smooth-turning rotating cap eases repeated, low-effort screwing.
- Ergonomically shaped, non-slip, almost nickel-free grip for a secure hold.
- Blade made of hardened molybdenum-vanadium steel, HRC 58 to 61, for a long service life.
- Burnished blade surface stays glare-free even under strong light.

TECHNICAL DATA

Feature	Value
Handle	aluminum with smooth-turning rotating cap
Handle property	ergonomically shaped, non-slip, almost nickel-free
Blade length	16 mm
Blade diameter	1.5 mm
Blade width	1.5 mm
Blade thickness	0.23 mm

Feature	Value
Blade material	molybdenum-vanadium steel, hardened HRC 58 to 61
Blade surface	burnished, glare-free
Overall length	83 mm
Weight	3 g

APPLICATION

- Model making as well as hobbyist and craft use with small slotted screws.
- Opening, setting, and readjusting devices in the electrical sector, precision mechanics, and watchmaking.
- Hobbyist and craft use as well as model making with fine slotted screws.
