Technical description

The SPANNFIX is a multifunctional vice with a flexible head and many possible applications. By using a high-quality ball joint, the head of the SPANNFIX can be tilted and fixed in any direction and offers optimum hold in any position. With the help of an adjusting screw at the lower seat of the ball, the ball mobility can be individually adjusted. The ball is held and released with a simple lever movement. Long service life is guaranteed by the high-quality, powder-coated cast aluminium and the surface-finished steel parts!
