

Complete PCB holder for HR 200 hybrid rework system - Ersä 0HR200-14

Item no. ER-0HR200-14

Manufacturer Ersä

Complete circuit-board holder for the ERSÄ HR 200 hybrid rework system. It clamps and positions the PCB securely while SMT components are desoldered and soldered. Genuine Kurtz Ersä accessory for the HR 200 (0HR200) rework station.

TECHNICAL DATA

Ausführungsklasse **TEC**Country of Manufacture **Germany**Weight **0.1 kg**

DESCRIPTION

The complete circuit-board holder is a genuine accessory for the ERSÄ HR 200 hybrid rework system (0HR200, 400 W). It receives the printed circuit board and keeps it securely in position while SMD/SMT components are desoldered and resoldered, so the board stays defined and repeatably fixtured throughout the rework process.

TECHNICAL DATA

Type	Complete circuit-board holder
Suitable for	ERSÄ HR 200 hybrid rework system (0HR200)
Article number	0HR200-14
Manufacturer	Kurtz Ersä GmbH, Wertheim
Country of origin	Germany
