

Permanent heel grounder with hook-and-loop fastener, blue - A1-ESD EP0104004

Item no. EP0104004

Manufacturer A1-ESD

The blue permanent heel grounder safely dissipates static charges through the footwear to ground. An extra-wide dual-layer rubber contact made of highly tear-resistant material and a 61 cm grounding tab give it high durability in continuous use.

TECHNICAL DATA

Ausführungsklasse	ESD (antistatic)
Colour	Blue
Norm	IEC 61340-5-1
Sales unit	1 Stück
Weight	0.1 kg

STANDARDS & COMPLIANCE

ESD safe IEC 61340-5-1

DESCRIPTION

The permanent heel grounder provides reliable personnel grounding in the ESD protected area and suits shoes with a flat heel. Its rugged build is made for intensive use.

BENEFITS

- Extra-wide dual-layer rubber heel contact made of highly tear-resistant material
- 61 cm long, 8-strand nylon-polyester grounding tab
- High-quality hook-and-loop fastener for a secure hold

TECHNICAL SPECIFICATIONS

- Grounding tab material: nylon-polyester, 8-strand
- Grounding tab length: 61 cm
- Contact point: dual-layer rubber, tear-resistant
- Resistance to ground: 1×10^6 to 1×10^9 ohm
- Closure: hook-and-loop
- Colour: blue

APPLICATIONS

The heel grounder is used in ESD protected areas of electronics manufacturing, assembly and test, and in cleanrooms with dissipative flooring.

STANDARDS AND COMPLIANCE

Complies with IEC 61340-5-1.
