

ESD hand lotion, conductive, with aloe vera, 235 ml

Item no. EP0106002

Manufacturer A1-ESD

Conductive hand lotion that optimises static dissipation in the ESD protected area. Improves contact between skin and grounding wrist strap and leaves no insulating film. With aloe vera, peach scent and vitamins A, D and E. 235 ml.

TECHNICAL DATA

Ausführungsklasse	ESD (antistatic)
Certification	IEC 61340-5-1
Sales unit	Flasche, 235 ml
Weight	0.1 kg

STANDARDS & COMPLIANCE

ESD safe IEC 61340-5-1

DESCRIPTION

The ESD hand lotion optimises dissipation through the skin and improves contact between the skin and the grounding wrist strap. Unlike conventional moisturisers it leaves no insulating film on the skin and so supports reliable personnel grounding.

BENEFITS

- Conductive, optimises dissipation in the ESD area
- Improves contact between skin and grounding wrist strap
- Leaves no insulating film on the skin
- Fast absorbing, with aloe vera and peach scent
- Contains vitamins A, D and E, free of harmful chemicals

TECHNICAL DATA

- Type: conductive hand lotion
- Additives: aloe vera, vitamins A, D, E, peach scent
- Content: 235 ml

APPLICATION

Apply to the hands before work and as needed to improve skin contact with the grounding wrist strap and to care for the skin.

STANDARDS AND COMPLIANCE

Supports personnel grounding in the ESD protected area in line with IEC 61340-5-1.
