

Nitrogen Nozzle B N2 Soldering - Hakko B2707

Item no. HK-B2707	Manufacturer Hakko	EAN 4962615532856
-------------------	--------------------	-------------------

Nitrogen nozzle B designed for use with Hakko N2 soldering tips in T6, T13, and T17 J02 format. Enables inert gas soldering for enhanced joint quality and reduced oxidation.

TECHNICAL DATA

Ausführungsklasse	TEC
Country of Manufacture	Japan
HS-Code	85159080
Note	Es gibt keine Lieferung von Hakko Produkten in die Schweiz
Weight	0.0099 kg

DESCRIPTION

OVERVIEW

The Hakko B2707 is a nitrogen nozzle B accessory designed for inert gas soldering applications. It is compatible with Hakko N2 soldering tips in multiple formats and sizes, enabling controlled nitrogen flow during the soldering process to minimize oxidation and improve solder joint quality.

KEY FEATURES

- Compatible with T6, T13, and T17 J02 format N2 soldering tips
- Precision-engineered for optimal nitrogen gas flow
- Reduces oxidation during soldering operations
- Enhances solder joint appearance and reliability
- Genuine Hakko replacement accessory

TECHNICAL SPECIFICATIONS

Compatible Tip Formats	T6, T13, T17 J02
Nozzle Type	Nitrogen (N2) Nozzle B
Application	Inert gas soldering
Country of Origin	Japan

APPLICATIONS

Ideal for precision soldering work requiring inert gas protection, including electronics assembly, component rework, and applications where oxidation prevention is critical for joint quality.
