

Nitrogen Nozzle Type C N2 - Hakko B3123

Item no. HK-B3123

Manufacturer Hakko

EAN 4962615021190

Nitrogen nozzle Type C designed for use with Hakko N2 soldering tips in T14 Format K, T20 Format K/BL3/D16, and T22 Format D08/D16/D24/K configurations. Essential component for nitrogen-assisted soldering applications.

TECHNICAL DATA

Ausführungsklasse	TEC
Country of Manufacture	Japan
HS-Code	85159080
Note	Es gibt keine Lieferung von Hakko Produkten in die Schweiz
Weight	0.0099 kg

B3123

DESCRIPTION

OVERVIEW

The Hakko B3123 is a precision nitrogen nozzle Type C engineered for use with Hakko N2 soldering tips across multiple format configurations. This component enables nitrogen-assisted soldering for enhanced heat transfer and improved solder joint quality in professional rework and production environments.

KEY FEATURES

- Type C nozzle design optimized for nitrogen flow
- Compatible with multiple soldering tip formats and sizes
- Supports T14 Format K configuration
- Supports T20 Format K, BL3, and D16 configurations
- Supports T22 Format D08, D16, D24, and K configurations
- Precision-engineered for consistent performance
- Japanese manufacturing quality

COMPATIBILITY

This nozzle is specifically designed for N2 soldering tips and is compatible with the following tip formats: T14 Format K, T20 Format K/BL3/D16, and T22 Format D08/D16/D24/K. Verify tip format before ordering to ensure proper fit and operation.

APPLICATIONS

Ideal for precision soldering, rework operations, and production environments where nitrogen-assisted soldering provides superior results. Commonly used in electronics assembly, component rework, and specialized soldering applications requiring enhanced thermal performance.
