

Nitrogen Nozzle E for N2
Soldering Tips - Hakko B3561

Item no. HK-B3561	Manufacturer Hakko	EAN 4962615033735
-------------------	--------------------	-------------------

Nitrogen nozzle E designed for use with Hakko N2 soldering tips in T20 Format D6 and T22 Format JD08 configurations. Enables nitrogen-assisted soldering for improved joint quality and reduced oxidation.

TECHNICAL DATA

Ausführungsklasse	TEC
Country of Manufacture	Japan
HS-Code	85159080
Note	Es gibt keine Lieferung von Hakko Produkten in die Schweiz
Weight	0.0099 kg

B3561

DESCRIPTION

OVERVIEW

The Hakko B3561 is a precision nitrogen nozzle designed specifically for use with Hakko N2 soldering tips. This accessory enables nitrogen-assisted soldering, which reduces oxidation and improves solder joint quality during precision electronic assembly and rework operations.

KEY FEATURES

- Compatible with T20 Format D6 soldering tips
- Compatible with T22 Format JD08 soldering tips
- Enables nitrogen-assisted soldering for superior joint quality
- Reduces oxidation during the soldering process
- Precision-engineered for reliable performance
- Japanese manufacturing quality

TECHNICAL SPECIFICATIONS

Compatible Tip Formats	T20 Format D6, T22 Format JD08
Nozzle Type	Nitrogen Nozzle E
Country of Origin	Japan

APPLICATIONS

Ideal for precision soldering applications requiring nitrogen-assisted technology, including fine-pitch component assembly, BGA rework, and high-reliability electronic manufacturing where solder joint quality is critical.
