

Soldering Tip Composite BL 400°C - Hakko T31-02BL

Item no.	HK-T31-02BL	Manufacturer	Hakko
Manufacturer no.	T31-02BL	EAN	4962615041631

Composite soldering tip in BL format designed for the Hakko FX-1001 induction heating handpiece. Maximum operating temperature 400°C. Durable construction for reliable soldering performance.

TECHNICAL DATA

Article authenticity	Original product
Condition of article	New
Country of Manufacture	Japan
Execution	TEC
HS-Code	85159080
Note	Es gibt keine Lieferung von Hakko Produkten in die Schweiz
Weight	0.0099 kg

STANDARDS & COMPLIANCE

ESD safe

DESCRIPTION

Overview

The Hakko T31-02BL is a composite soldering tip in BL format, engineered for use with the Hakko FX-1001 induction heating handpiece. This replacement tip delivers consistent heat transfer and durability for professional soldering applications requiring temperatures up to 400°C.

Key Features

- Composite construction for enhanced durability and heat retention
- BL format geometry optimized for precision soldering
- Maximum operating temperature: 400°C
- Compatible with FX-1001 IH (induction heating) system

- Reliable thermal performance for production and repair work

Technical Specifications

Tip Format	BL
Maximum Temperature	400°C
Material	Composite
Compatible Handpiece	Hakko FX-1001
System Type	Induction Heating (IH)

Applications

Ideal for general-purpose soldering, PCB assembly, component rework, and maintenance applications where reliable thermal performance and tip longevity are essential.
