

Composite Soldering Tip 0.8mm WD 450°C - Hakko T31-01WD08

Item no. HK-T31-01WD08

Manufacturer Hakko

EAN 4962615041600

High-performance composite soldering tip for Hakko FX-1001 induction heating handpiece. 0.8mm WD format with 450°C maximum operating temperature. Engineered for precision soldering applications.

TECHNICAL DATA

Ausführungsklasse	TEC
Country of Manufacture	Japan
HS-Code	85159080
Note	Es gibt keine Lieferung von Hakko Produkten in die Schweiz
Weight	0.0099 kg

DESCRIPTION

OVERVIEW

The Hakko T31-01WD08 is a composite soldering tip specifically designed for the FX-1001 induction heating handpiece. This 0.8mm WD (wide, deep) format tip delivers reliable heat transfer and superior durability for precision soldering work.

KEY FEATURES

- Composite construction for extended tip life
- 0.8mm WD format for fine-pitch soldering
- Maximum operating temperature: 450°C
- Optimized for Hakko FX-1001 IH system
- Excellent thermal conductivity and heat retention
- Reduced oxidation and improved wetting

TECHNICAL SPECIFICATIONS

Tip Format	0.8mm WD
Maximum Temperature	450°C
Tip Material	Composite
Compatible Handpiece	FX-1001 (Induction Heating)

APPLICATIONS

Ideal for fine-pitch component soldering, surface mount technology (SMT) work, and precision electronics assembly where controlled heat delivery and tip durability are essential.

SCOPE OF DELIVERY

- 1x Hakko T31-01WD08 Composite Soldering Tip
