

Desoldering Nozzle 1.0mm - Hakko B1309

Item no. HK-B1309

Manufacturer Hakko

EAN 4962615520563

Precision 1.0mm desoldering nozzle designed for Hakko desoldering irons and stations. Compatible with models 808, 809, FR300, FR301, FR4001, FR4101, FR4003, and FR4103. Sold as pack of 10 units.

TECHNICAL DATA

Ausführungsklasse	TEC
Country of Manufacture	Japan
HS-Code	85159080
Note	Es gibt keine Lieferung von Hakko Produkten in die Schweiz
Weight	0.0099 kg

DESCRIPTION

OVERVIEW

The Hakko B1309 is a precision desoldering nozzle with a 1.0mm bore diameter, engineered for efficient solder removal from fine-pitch components and delicate PCB assemblies. This consumable tip is compatible with a comprehensive range of Hakko desoldering equipment, making it an essential replacement for maintenance and high-volume production environments.

KEY FEATURES

- 1.0mm bore diameter for precise solder pickup
- Compatible with 8 Hakko desoldering models
- Pack of 10 nozzles for extended operational use
- Precision-engineered for consistent performance
- Ideal for fine-pitch and micro-component work
- Durable construction for repeated use

TECHNICAL SPECIFICATIONS

Nozzle Bore Diameter	1.0mm
Quantity per Pack	10 pieces
Compatible Models	808, 809, FR300, FR301, FR4001, FR4101, FR4003, FR4103

Country of Origin	Japan
-------------------	-------

APPLICATIONS

Ideal for desoldering fine-pitch components, BGA rework preparation, micro-electronics assembly, and precision PCB repair. Suitable for both manual and automated desoldering workflows in electronics manufacturing and repair facilities.

SCOPE OF DELIVERY

- 10 × Desoldering nozzles (1.0mm bore)
