

Hot Air Nozzle QFP 20×20 - Hakko A1261B

Item no. HK-A1261B	Manufacturer Hakko	EAN 4962615009310
--------------------	--------------------	-------------------

Precision hot air nozzle designed for QFP 20×20 component rework. Compatible with Hakko hot air stations 850, 852, FR-801, FR-802, and FR-803. Enables efficient desoldering and soldering of surface-mount devices.

TECHNICAL DATA

Ausführungsklasse	TEC
Country of Manufacture	Japan
HS-Code	85159080
Note	Es gibt keine Lieferung von Hakko Produkten in die Schweiz
Weight	0.0099 kg

DESCRIPTION

OVERVIEW

The Hakko A1261B is a specialized hot air nozzle engineered for precision rework of QFP (Quad Flat Package) 20×20 components. This nozzle is compatible with Hakko’s professional hot air rework stations, including models 850, 852, FR-801, FR-802, and FR-803, making it an essential accessory for electronics repair and PCB assembly operations.

KEY FEATURES

- Optimized design for QFP 20×20 package geometry
- Uniform heat distribution for reliable component removal and placement
- Compatible with multiple Hakko hot air station models
- Durable construction for extended operational life
- Precision-engineered for professional rework applications

TECHNICAL SPECIFICATIONS

Nozzle Type	QFP 20×20
Compatible Stations	Hakko 850, 852, FR-801, FR-802, FR-803
Country of Origin	Japan

APPLICATIONS

Ideal for desoldering and soldering QFP 20×20 surface-mount components in electronics repair, PCB rework, and manufacturing environments. Provides precise thermal control for sensitive component handling.

SCOPE OF DELIVERY

- 1× Hakko A1261B Hot Air Nozzle QFP 20×20
