

Hot Air Nozzle QFP 28×28mm - Hakko A1129B

Item no. HK-A1129B

Manufacturer Hakko

EAN 4962615009181

Specialized hot air nozzle designed for QFP 28×28mm package rework. Compatible with Hakko 850, 852, FR-801, FR-802, and FR-803 hot air stations. Precision-engineered for consistent thermal distribution.

TECHNICAL DATA

Ausführungsklasse	TEC
Country of Manufacture	Japan
HS-Code	85159080
Note	Es gibt keine Lieferung von Hakko Produkten in die Schweiz
Weight	0.0099 kg

DESCRIPTION

OVERVIEW

The Hakko A1129B is a precision hot air nozzle specifically designed for reworking QFP (Quad Flat Package) components measuring 28×28mm. This nozzle is engineered to deliver uniform heat distribution across the package footprint, making it ideal for professional electronics assembly and repair operations.

KEY FEATURES

- Optimized for QFP 28×28mm package geometry
- Uniform thermal distribution for reliable reflow
- Compatible with multiple Hakko hot air station models
- Precision-engineered construction for consistent performance
- Professional-grade rework capability

COMPATIBILITY

This nozzle is compatible with the following Hakko hot air stations: 850, 852, FR-801, FR-802, and FR-803. Verify compatibility with your specific station model before ordering.

TECHNICAL SPECIFICATIONS

Nozzle Type	Hot Air Nozzle
Package Size	QFP 28×28mm
Compatible Stations	850, 852, FR-801, FR-802, FR-803
Country of Origin	Japan

APPLICATIONS

Ideal for surface mount device (SMD) rework, component replacement, and thermal profiling of QFP packages in electronics manufacturing, repair, and prototyping environments.
