DESCRIPTION

OVERVIEW

The Hakko A1258B is a specialized hot air nozzle designed for rework operations on small-outline packages (SOP). With dimensions of 7.6×12.7mm, this nozzle provides focused, controlled heat delivery for precise soldering and desoldering tasks on compact circuit board assemblies.

KEY FEATURES

- SOP-format nozzle geometry optimized for small-outline package components
- Dimensions: 7.6×12.7mm for targeted heat application
- Compatible with multiple Hakko hot air stations for versatile workshop integration
- Enables precise rework without affecting surrounding components
- Durable construction for extended operational life
