

AM CC Ethernet/IP Interface Module - Bosch Rexroth 3842559444

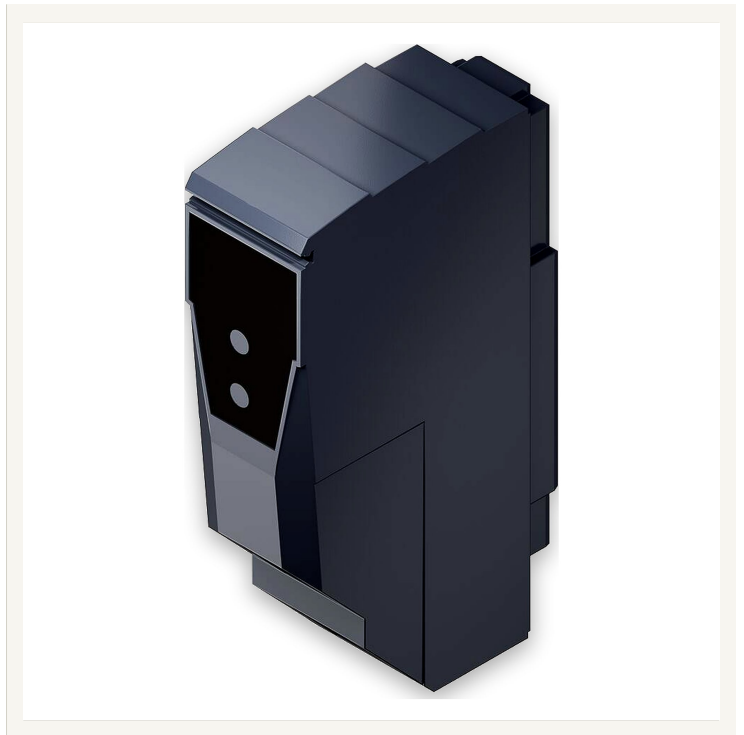

Item no. BRR-3842559444

Manufacturer Bosch Rexroth

Interface module for connecting Bosch Rexroth AM CC assembly technology systems to Ethernet/IP networks. Enables cyclic process data exchange between the assembly control unit and higher-level Ethernet/IP controllers. Designed for industrial assembly and handling lines.

TECHNICAL DATA

Weight 0.1 kg

DESCRIPTION

The AM CC Ethernet/IP interface module integrates Bosch Rexroth assembly technology (AM CC) into Ethernet/IP-based control environments, allowing straightforward connection to PLCs and supervisory systems without additional gateways.

- **Ethernet/IP connectivity:** Standardised industrial Ethernet protocol for cross-vendor interoperability with controllers and SCADA systems.
- **Compact and lightweight:** At 0.06 kg, the module mounts directly on the AM CC assembly without adding significant load.
- **PVC housing:** Durable plastic enclosure suited to continuous industrial operation.

TECHNICAL DATA

Property	Value
Protocol	Ethernet/IP
Housing material	PVC
Mass	0.06 kg
Article number	3842559444
